

JOURNAL OF INTEGRAL
EQUATIONS AND APPLICATIONS

Volume 1

Fall 1988

Number 4

CONTENTS

Random fredholm integral equations of the second kind with degenerate kernels II. Bounds for probabilities By G. RICHTER	455
Representation theory of topological selections of multivalued linear mappings with applications to integral and differential operators By SUNG J. LEE AND M. ZUHAIR NASHED	479
Asymptotic behavior of solutions to volterra integro-differential equations By Z. JACKIEWICZ, M. KLAUS AND C. O' CINNEIDE	501
The delta-trigonometric method using the single-layer potential representation By RAYMOND SHENG CHEIH CHENG AND DOUGLAS N. ARNOLD	517
On integral equations of the first kind with logarithmic kernels By Y. YAN AND I.H. SLOAN	549
Uniform asymptotic stability of a class of integro-differential systems By T. KRISZTIN	581
Errata	599
Volume Index	601
