
CONTENTS

INTRODUCTION: DEDICATION TO CHARLES W. GROETSCH
By KENDALL ATKINSON AND PAUL MARTIN 353

Derivative spectroscopy—An enhanced role for numerical
differentiation
By R.S. ANDERSSSEN AND M. HEGLAND 355

An extension of the variational inequality approach for
obtaining convergence rates in regularization of nonlinear
ill-posed problems
By RADU IOAN BOȚ AND BERND HOFMANN 369

Local regularization of nonlinear Volterra equations of
Hammerstein type
By CARA D. BROOKS, PATRICIA K. LAMM
AND XIAOYUE LUO 393

Kernel perturbations for Volterra convolution integral equations
By F.R. DE HOOG AND R.S. ANDERSSSEN 427

An integro-differential equation model for the spread of
alcohol abuse
By DONALD A. FRENCH, ZEYNEP TEYMUROGLU,
TIMOTHY J. LEWIS AND RICHARD J. BRAUN 443

An iterative method for Tikhonov regularization with a
general linear regularization operator
By MICHIEL E. HOCHSTENBACH AND LOTHAR REICHEL ... 465

On the generalized discrepancy principle for Tikhonov
regularization in Hilbert scales
By S. LU, S.V. PEREVERZEV, Y. SHAO
AND U. TAUTENHAHN 483

Robust GCV choice of the regularization parameter for
correlated data
By MARK A. LUKAS 519
