
CONTENTS

Numerical solution of an integral equation from
point process theory
By R.S. ANDERSSON, A.J. BADDELEY,
F.R. DE HOOG AND G.M. NAIR 437

Rate of approximation for multivariate sampling
Kantorovich operators on some functions spaces
By DANILO COSTARELLI AND GIANLUCA VINTI 455

The compactness of a weakly singular integral
operator on weighted Sobolev spaces
By DAVID ELLIOTT 483

On a new class of integro-differential equations
By PATRICK KURTH 497

Approximate controllability of impulsive Riemann-
Liouville fractional equations in Banach spaces
By ZHENHAI LIU AND MAOJUN BIN 527

Active manipulation of fields modeled by the
Helmholtz equation
By DANIEL ONOFREI 553

On the half-Hartley transform, its iteration and
compositions with Fourier transforms
By S. YAKUBOVICH 581

Volume Index for Volume 26 609
