JOURNAL OF INTEGRAL
EQUATIONS AND APPLICATIONS

Volume 30 SPRING 2018 Number 1

CONTENTS

Introduction to the Special Issue Honoring W.E. Olmstead
By Colleen M. Kirk and Catherine A. Roberts 1

On the Contributions of W. Edward Olmstead
By C.M. Kirk and L.R. Ritter 3

On a semi-linear system of nonlocal time and space reaction diffusion equations with exponential nonlinearities
By B. Ahmad, A. Alsaedi, D. Hnaien and M. Kirane 17

Existence of a solution for the problem with a concentrated source in a subdiffusive medium
By C.Y. Chan and H.T. Liu 41

Blow-up of solutions for semilinear fractional Schrödinger equations
By A.Z. Fino, I. Dannawi and M. Kirane 67

A blow-up result to a delayed Cauchy viscoelastic problem
By Mohammad Kafini and Muhammad I. Mustafa 81

General decay for a laminated beam with structural damping and memory: The case of non-equal wave speeds
By Gang Li, Xiangyu Kong and Wenjun Liu 95

General and optimal decay in a memory-type Timoshenko system
By Salim A. Messaoudi and Jamilu Hashim Hassan . . . 117

Coupled Volterra integral equations with blowing up solutions
By Wojciech Mydlarczyk 147

Solution estimates for a system of nonlinear integral equations arising in optometry
By Wojciech Okrasiński and Łukasz Płociniczak 167

CONTENTS CONTINUED ON LAST PAGE

Blow up of fractional reaction-diffusion systems with and without convection terms
By Aroldo Pérez 181

Split-step collocation methods for stochastic Volterra integral equations
By Y. Xiao, J.N. Shi and Z.W. Yang 197
