
CONTENTS

Exponential decay estimates of the eigenvalues for the
Neumann-Poincaré operator on analytic boundaries
in two dimensions
By KAZUNORI ANDO, HYEONBAE KANG AND
YOSHIHISA MIYANISHI 473

On the unique characterization of continuous
distributions by single regression of non-adjacent
generalized order statistics
By MARIUSZ BIENIEK AND KRYSZYNA MACIĄG 491

On the numerical solution of the exterior elasto-
dynamic problem by a boundary integral equation
method
By ROMAN CHAPKO AND LEONIDAS MINDRINOS 521

Stable and center-stable manifolds of admissible classes
for partial functional differential equations
By TRINH VIET DUOC AND NGUYEN THIEU HUY 543

On the oscillation of discrete Volterra equations with
positive and negative nonlinearities
By ABDULLAH ÖZBEKLER 577

Volume Index for Volume 30 593
