

CONTENTS

S. MATSUMOTO , Correlation functions of the shifted Schur measure	619
A. MATSUO , 3-transposition groups of symplectic type and vertex operator algebras	639
T. HAYAKAWA , Divisorial contractions to 3-dimensional terminal singularities with discrepancy one	651
T. HOSOKAWA and K. IZUCHI , Essential norms of differences of composition operators on H^∞	669
M. A. RAGUSA and A. TACHIKAWA , On continuity of minimizers for certain quadratic growth functionals	691
T. ZAMFIRESCU , The strange aspect of most compacta	701
Y. ABE , A statement of Weierstrass on meromorphic functions which admit an algebraic addition theorem	709
T. ASUKE , On quasiconformal deformations of transversely holomorphic foliations	725
Y. XIE , Convergence of stochastic integrals with respect to Hilbert-valued semimartingales	735
G. HECTOR, S. MATSUMOTO and G. MEIGNIEZ , Ends of leaves of Lie foliations ..	753
S. STEVIĆ , On harmonic function spaces	781
K. UCHINO , Lagrangian calculus on Dirac manifolds	803
K. HORIE , Triviality in ideal class groups of Iwasawa-theoretical abelian number fields	827
G. ZWARA , Orbit closures for representations of Dynkin quivers are regular in codimension two	859
O. SAEKI and K. SUZUOKA , Generic smooth maps with sphere fibers	881
T. AIKI , A model of 3D shape memory alloy materials	903
