

CONTENTS

Moto O'UCHI , On covariant representations of continuous C^* -dynamical systems	201
Tetsuo SAITO , Hölder estimates on higher derivatives of the solution for $\bar{\partial}$ -equation with C^k -data in strongly pseudoconvex domain	213
Masaaki TSUCHIYA , On the stochastic differential equation for a two-dimensional Brownian motion with boundary condition	233
Morikuni GOTO , Cartan subgroups of a Lie group	251
Wolf VON WAHL , Regularitätsfragen für die instationären Navier- Stokesschen Gleichungen in höheren Dimensionen	263
Yoshimichi TSUNO , Holomorphic continuation of solutions of partial differential equations across the multiple characteristic surface	285
Katsuo KAWAKUBO , Global and local equivariant characteristic numbers of G -manifolds	301
Shoshichi KOBAYASHI , The first Chern class and holomorphic symmetric tensor fields	325
Kenzo ADACHI , Continuation of A^∞ -functions from submanifolds to strictly pseudoconvex domains	331
S. NABABAN and K. L. TEO , On the existence of optimal controls of the first boundary value problems for parabolic partial delay-differential equations in divergence form	343
Tetsuzo KIMURA and Hiroshi NIITSUMA , Regular local ring of characteristic p and p -basis	363
Moto-o TAKAHASHI , Some simple cases of Poincaré conjecture	373
Toshio OSHIMA and Toshihiko MATSUKI , Orbits on a symmetric spaces under the action of the isotropy subgroups	399
