

CONTENTS

A. BENSOUSSAN and J. L. LIONS , On the support of the solution of some variational inequalities of evolution	1
Keisaku KUMAHARA , Fourier transforms on the motion groups	18
Sadahiro SAEKI , Tensor products of $C(X)$ -spaces and their conjugate spaces	33
Tetsuya ASAI , On the Fourier coefficients of automorphic forms at various cusps and some applications to Rankin's convolution	48
Takashi ONO , Quadratic fields and Hopf fibrations	62
Martin SCHECHTER , Scattering theory for elliptic systems	71
Masaki KASHIWARA, Takahiro KAWAI and Toshio OSHIMA , Structure of a single pseudo-differential equation in a real domain	80
Yasunori OKABE , On the germ fields of stationary Gaussian processes with Markovian property	86
Tadayasu TAKAHASHI , Convergence of difference approximation of nonlinear evolution equations and generation of semigroups	96
Hiroo MIKI , On some Galois cohomology groups of a local field and its application to the maximal p -extension	114
Ei-ichi SATO , Uniform vector bundles on a projective space	123
Kazuaki KOBAYASHI and Yasuyuki TSUKUI , The ball coverings of manifolds	133
Chung-Chun YANG , Some results on the x -points and factorization of entire and meromorphic functions	144
Manabu HARADA , A ring theoretical proof in a factor category of indecomposable modules	160
Wataru TAKAHASHI , Nonlinear variational inequalities and fixed point theorems	168
Katsuei KENMOTSU , On minimal immersions of R^2 into S^N	182
Ken-iti SATO , Asymptotic properties of eigenvalues of a class of Markov chains induced by direct product branching processes	192
C. L. SHARMA , Some functors on Grothendieck exact sequences of type I	212
