

## CONTENTS

<b>Akira SAKAI</b> , Localization theorem for holomorphic approximation on open Riemann surfaces .....	189
<b>K. F. CLANCEY and C. R. PUTNAM</b> , Normal parts of certain operators .....	198
<b>Shukichi TANNO</b> , A formula on some odd-dimensional Riemannian manifolds related to the Gauss-Bonnet formula .....	204
<b>Takesi WATANABE</b> , Some potential theory of processes with stationary independent increments by means of the Schwartz distribution theory .....	213
<b>par Masahiko SAITO</b> , Représentations unitaires des groupes symplectiques .....	232
<b>Eiichi BANNAI</b> , On rank 3 groups with a multiply transitive constituent .....	252
<b>Fuichi UCHIDA</b> , Periodic maps and circle actions .....	255
<b>Yasuo MORITA</b> , On transcendency of special values of arithmetic automorphic functions .....	268
<b>Mamoru NUNOKAWA</b> , On Bazilevi functions of bounded boundary rotation .....	275
<b>Yukio MATSUMOTO</b> , On homotopy invariance of triangulability of certain 5-manifolds .....	279
<b>Teturo KAMAE</b> , A topological invariant of substitution minimal sets .....	285
<b>Koji KATAYAMA</b> , On zeta-theta functions .....	307
<b>Hiroshi SAITO</b> , On Eichler's trace formula .....	333
<b>Ken-ichi MIYAZAKI</b> , $(p, q; r)$ -absolutely summing operators .....	341
