

## CONTENTS

<b>H. MARUOKA, A. MATSUO and H. SHIMAKURA</b> , Classification of vertex operator algebras of class $S^4$ with minimal conformal weight one .....	1369
<b>T. SUZUKI and T. TSUCHIYA</b> , First and second Hadamard variational formulae of the Green function for general domain perturbations .....	1389
<b>C. E. PARRA and M. SAORÍN</b> , On hearts which are module categories .....	1421
<b>B. BERNDTSSON and L. LEMPERT</b> , A proof of the Ohsawa–Takegoshi theorem with sharp estimates .....	1461
<b>J. PETEAN and J. M. RUIZ</b> , Stable solutions of the Yamabe equation on non-compact manifolds .....	1473
<b>I. SABADINI and F. SOMMEN</b> , A Fourier–Borel transform for monogenic functionals .....	1487
<b>T. CASS, B. K. DRIVER, N. LIM and C. LITTERER</b> , On the integration of weakly geometric rough paths .....	1505
<b>E. USHIKOSHI</b> , Hadamard variational formula for the Green function of the Stokes equations under the general second order perturbation .....	1525
<b>H. SAITO and Y. SHIBATA</b> , On decay properties of solutions to the Stokes equations with surface tension and gravity in the half space .....	1559
<b>Y. HAMANA and H. MATSUMOTO</b> , Hitting times of Bessel processes, volume of the Wiener sausages and zeros of Macdonald functions .....	1615
<b>M. FURUTA and S. MATSUO</b> , The perturbation of the Seiberg–Witten equations revisited .....	1655
<b>J. ZHAO</b> , Identity families of multiple harmonic sums and multiple zeta star values .....	1669
<b>H. W. CHO</b> , Periodicity and the values of the real Buchstaber invariants .....	1695
<b>A. AYZENBERG</b> , Locally standard torus actions and $h'$ -numbers of simplicial posets .....	1725
<b>G. MEIGNIEZ</b> , Realizing compactly generated pseudo-groups of dimension one ..	1747
<b>S. HIROSE and Y. KASAHARA</b> , A uniqueness of periodic maps on surfaces .....	1777
<b>F. PRIZIAC</b> , Equivariant weight filtration for real algebraic varieties with action ..	1789
