

## CONTENTS

<b>S. GARTI and Y. HAYUT,</b> Magidor cardinals .....	1
<b>M. BROZOS-VÁZQUEZ, E. GARCÍA-RÍO and P. B. GILKEY,</b> Homogeneous affine surfaces: affine Killing vector fields and gradient Ricci solitons .....	25
<b>B. F. SEHBA,</b> On two-weight norm estimates for multilinear fractional maximal function .....	71
<b>K. L. BAKER and A. H. MOORE,</b> Montesinos knots, Hopf plumbings, and L-space surgeries .....	95
<b>N. HONDA and K. UMETA,</b> Laplace hyperfunctions in several variables .....	111
<b>E. N. NIKOLIDAKIS,</b> A Hardy inequality and applications to reverse Hölder inequalities for weights on $\mathbb{R}$ .....	141
<b>M. BOLKART, Y. GIGA and T. SUZUKI,</b> Analyticity of the Stokes semigroup in $BMO$ -type spaces .....	153
<b>Y. KOMORI and H. TSUMURA,</b> On Arakawa-Kaneko zeta-functions associated with $GL_2(\mathbb{C})$ and their functional relations .....	179
<b>B. GUERVILLE-BALLÉ,</b> Multiplicativity of the $\mathcal{I}$ -invariant and topology of glued arrangements .....	215
<b>Y.-P. LEE and F. QU,</b> A product formula for log Gromov-Witten invariants .....	229
<b>K. TSUDA,</b> Time periodic problem for the compressible Navier-Stokes equation on $\mathbb{R}^2$ with antisymmetry .....	243
<b>S. LIU,</b> Fermionic formula for double Kostka polynomials .....	283
<b>H. NAKASHIMA,</b> Basic relative invariants of homogeneous cones and their Laplace transforms .....	325
<b>D. A. GOMES, H. MITAKE and H. V. TRAN,</b> The selection problem for discounted Hamilton-Jacobi equations: some non-convex cases .....	345
<b>S. GOTO and L. T. NHAN,</b> On the sequential polynomial type of modules .....	365
<b>K. INABA, M. KAWASHIMA and M. OKA,</b> Topology of mixed hypersurfaces of cyclic type .....	387
<b>Q. GUAN and Z. LI,</b> A characterization of regular points by Ohsawa-Takegoshi extension theorem .....	403
<b>L. ORNEA, M. VERBITSKY and V. VULETESCU,</b> Weighted Bott-Chern and Dolbeault cohomology for LCK-manifolds with potential .....	409
