

Kyoto Journal of Mathematics

Volume 52 · Number 3 · Fall 2012

- 433 **Smoothing effect of weak solutions for the spatially homogeneous Boltzmann equation without angular cutoff**
Radjesvarane Alexandre, Yoshinori Morimoto, Seiji Ukai, Chao-Jiang Xu, and Tong Yang
- 465 **Special values of the Hurwitz zeta function via generalized Cauchy variables**
Takahiko Fujita and Yuko Yano
- 479 **On the homotopy types of the independence complexes of grid graphs with cylindrical identification**
Kouyemon Iriye
- 503 **On the complement of effective divisors with semipositive normal bundle**
Takeo Ohsawa
- 517 **Partial holomorphic connections and extension of foliations**
Isaia Nisoli
- 557 **Aharanov–Bohm effect in resonances of magnetic Schrödinger operators in two dimensions**
Hideo Tamura
- 597 **Strongly symmetric smooth toric varieties**
M. Cuntz, Y. Ren, and G. Trautmann
- 621 **Quantum toroidal \mathfrak{gl}_1 -algebra: Plane partitions**
B. Feigin, M. Jimbo, T. Miwa, and E. Mukhin
