

- 515    **Explicit description of jumping phenomena on moduli spaces of parabolic connections and Hilbert schemes of points on surfaces**  
Arata Komyo and Masa-Hiko Saito
- 553    **A fractional calculus approach to rough integration**  
Yu Ito
- 575    **Cotorsion pairs in categories of quiver representations**  
Henrik Holm and Peter Jørgensen
- 607    **A local rigidity theorem for finite actions on Lie groups and application to compact extensions of  $\mathbb{R}^n$**   
Ali Baklouti, Souhail Bejar, and Ramzi Fendri
- 619    **Explicit calculation of local integrals for twisted triple product  $L$ -functions**  
Isao Ishikawa
- 649    **Spin networks, Ehrhart quasipolynomials, and combinatorics of dormant indigenous bundles**  
Yasuhiro Wakabayashi
- 685    **Deformation equivalence classes of Inoue surfaces with  $b_1 = 1$  and  $b_2 = 0$**   
Shota Murakami
- 703    **Small embeddings of integral domains**  
Yu Yang Bao and Daniel Daigle
- 717    **Kolyvagin systems and Iwasawa theory of generalized Heegner cycles**  
Matteo Longo and Stefano Vigni
