CONTENTS

Vol. 19, No. 2, June 1967

NOBUYUKI SUITA, On a continuity lemma of extremal length and its applica- tions to conformal mapping.	129
MINORU SAKAGUCHI, Relative efficiency of the wald spart and the Chernoff information number.	138
MINORU SAKAGUCHI, Interaction information in multivariate probability dis- tributions.	147
SHŪKICHI TANNO, Curvature-preserving transformations of K -contact Riemann- ian manifolds.	156
HIROHISA HATORI, TOSHIO MORI AND HIROSHI OODAIRA, A renewal theorem on (J, X) -processes.	159
BURTON RODIN AND LEO SARIO, Convergence of normal operators.	165
MOTOO HORI AND MINORU UCHIDA, Application of the theory of Markov processes to comminution, I. The case of discrete time parameter.	174
HIROSHI HATORI, TOSHIO MORI AND HIROSHI OODAIRA, A remark concerning a renewal theorem on (J, X) -processes.	189
KOICHI OGIUE, Theory of conformal connections.	193
KATSUHIRO SHIOHAMA, Cylinders in Euclidean space E^{2+N}	225
YOSHIOMI NAKAGAMI, A remark on probabilistical definiteness for self-adjoint operators.	229
GENKŌ HIROMI AND HIDEO MUTŌ, On the existence of analytic mappings, I.	236
MITSURU OZAWA, On an ultrahyperelliptic surface whose Picard's constant is three.	245
