

CONTENTS

	Page
Donat K. Kazarinoff A simple proof of the Erdős-Mordell inequality for triangles	97
Nicholas D. Kazarinoff D. K. Kazarinoff's inequality for tetrahedra	99
Ralph Palmer Agnew The Lototsky method for evaluation of series	105
G. Piranian and W. J. Thron Convergence properties of sequences of linear fractional transformations . .	129
Avner Friedman On the properties of a singular Sturm-Liouville equation determined by its spectral functions	137
F. Bagemihl Rectilinear limits of a function defined inside a sphere	147
George Piranian Ambiguous points of a function continuous inside a sphere	151
F. Bagemihl Ambiguous points of a function harmonic inside a sphere	153
P. T. Church Ambiguous points of a function homeomorphic inside a sphere	155
G. R. Livesay On maps of the three-sphere into the plane	157
John Lamperti On flows of measure-preserving transformations	161
Allen Shields The n-cube as a product semigroup	165
M. L. Curtis and M. K. Fort, Jr. Certain subgroups of the homotopy groups	167
J. G. Wendel Invariance of normal distributions	173
H. Tietz Faber series and the Laurent decomposition	175
R. A. Rankin The construction of automorphic forms from the derivatives of given forms	181
D. J. Lewis Strongly definite polynomials	187

The Michigan Mathematical Journal is published by the University of Michigan Press, Ann Arbor, Michigan, U. S. A. Each volume consists of two or more issues of about 100 pages each. The price per issue is \$1.00, direct or less from individuals, and \$3 on orders from institutions.
