TABLE OF CONTENTS

VOLUME 5, 1958

		Page
In Memoriam Sumner B. Myers, 1910-1955		1
Richard Arens	Dense inverse-limit rings	169
Louis Auslander	On the sheeted structure of compact locally affine spaces	163
William M. Boothby	Hermitian manifolds with zero curvature	229
Raoul Bott	The space of loops on a Lie group	35
D. G. Bourgin	A real continuous function on a space admitting two periodic homeomorphisms	247
R. Creighton Buck	Bounded continuous functions on a locally compact space	95
Eugenio Calabi	Improper affine hyperspheres of convex type and a generalization of a theorem by K. Jörgens	105
Shiing-shen Chern and K. Lashof	On the total curvature of immersed manifolds, II	5
N. Coburn	Simple waves in the steady rotational plane supersonic flow of a polytropic gas of constant entropy	129
Paul Erdös and George Piranian	The topologization of a sequence space by Toeplitz matrices	139
B. L. Foster	Differentiation on manifolds without a connection	183
F. W. Gehring	On solutions of the equation of heat conduction	191
L. W. Green	A theorem of E. Hopf	31
L. J. Heider	A representation theory for measures on Boolean algebras	213
Edwin Hewitt	The asymmetry of certain algebras of Fourier-Stieltjes transforms	149
T. H. Hildebrandt	Iterated limits	79
Chuan-Chih Hsiung	A uniqueness theorem on two-dimensional Riemannian manifolds with boundary	25
J. L. Kelley	Hypercomplete linear topological spaces	235
R. G. Kuller	Locally convex topological vector lattices and their representations	83
Richard K. Lashof and Shiing-shen Chern, see Shiing-shen Chern and Richard K. Lashof.		
J. E. McLaughlin	A note on regular group rings	127
George Piranian and Paul Erdös, see Paul Erdös and George Piranian.		
Ralph A. Raimi	Equicontinuity and compactness in locally convex topological linear spaces	203
Maxwell O. Reade	Two applications of close-to-convex functions	91
C. E. Rickart	An elementary proof of a fundamental theorem in the theory of Banach algebras	75
Walter Rudin	Independent perfect sets in groups	159
Hans Samelson	On curvature and characteristic of homogeneous spaces	13
R. L. Wilder	Monotone mappings of manifolds, II	19
Kentaro Yano	Some integral formulas and their applications	63
G. S. Young	A generalization of Bagemihl's theorem on ambiguous points	223

CONTENTS

Page

R. Creighton Buck
Bounded continuous functions on a locally compact space 95

Eugenio Calabi
Improper affine hyperspheres of convex type and a generalization of a theorem by K. Jörgens 105

J. E. McLaughlin
A note on regular group rings 127

N. Coburn
Simple waves in the steady rotational plane supersonic flow of a polytropic gas of constant entropy 129

P. Erdös and G. Piranian
The topologization of a sequence space by Toeplitz matrices 139

Edwin Hewitt
The asymmetry of certain algebras of Fourier-Stieltjes transforms 149

Walter Rudin
Independent perfect sets in groups 159

Louis Auslander
On the sheeted structure of compact locally affine spaces 163

Richard Arens
Dense inverse-limit rings 169

B. L. Foster
Differentiation on manifolds without a connection 183

F. W. Gehring
On solutions of the equation of heat conduction 191

Ralph A. Raimi
Equicontinuity and compactness in locally convex topological linear spaces 203

L. J. Heider
A representation theory for measures on Boolean algebras 213

G. S. Young
A generalization of Bagemihl's theorem on ambiguous points 223

William M. Boothby
Hermitian manifolds with zero curvature 229

J. L. Kelley
Hypercomplete linear topological spaces 235

D. G. Bourgin
A real continuous function on a space admitting two periodic homeomorphisms 247

The Michigan Mathematical Journal is published by the University of Michigan Press, Ann Arbor, Michigan, U. S. A. Each volume consists of two or more issues of about 100 pages each. The price per issue is $1 on direct orders from individuals, and $3 on orders from institutions.
