DEPARTMENT OF MATHEMATICS

THE UNIVERSITY OF MICHIGAN

ANN ARBOR, MICHIGAN, U.S.A.

ISSN 0026-2285

The Michigan Mathematical Journal is published by the Department of Mathematics at the University of Michigan and endeavors to publish significant research articles in all areas of mathematics. One volume is published each year, and each volume consists of three issues. The subscription price is \$50 per volume (postage included); single issues may be purchased for \$17. Subscriptions intended for the private use of individuals are available at the reduced rate of \$25 per volume.

Subscription orders should be sent to the Business Manager, Michigan Mathematical Journal, Department of Mathematics, University of Michigan, Ann Arbor, Michigan, 48109. All subscriptions must be prepaid in U.S. funds. The Journal will accept payment for subscriptions one, two, or three years in advance. Checks and money orders should be made payable to the Michigan Mathematical Journal.

Volumes 12 through 23 (1965–1976) consist of four issues per volume; earlier volumes vary in size from one to three issues. Volumes 12 through 37 may be purchased from the publisher at the price of \$50 per volume. Volumes 1 through 9 are no longer available from the University of Michigan; they may be purchased from the Johnson Reprint Corporation, 111 Fifth Avenue, New York, N.Y., 10003. Volumes 10 and 11 are not available.

To submit a paper for publication, an author should send two copies of the manuscript to the Editor, Michigan Mathematical Journal, University of Michigan, Ann Arbor, Michigan, 48109. The submission of a paper implies the author's assurance that it has not been copyrighted, published, or submitted for publication elsewhere. Preference will be given to manuscripts between ten and forty pages in length. All authors of papers accepted for publication will be required to sign a transfer of copyright agreement.

To help defray the cost of publication of the journal, page charges of \$25 per printed page will be billed to the author's institution. If the institution is unable to pay any charges, the author will be asked to pay a nominal fee for 100 offprints; joint authors will share the 100 offprints.

Authors should strive for expository clarity and good literary style. Manuscripts lacking in these respects will not be published. Manuscripts submitted for publication should be neatly typed on one side of the page only, double spaced (including references), with generous margins. Diagrams should be drawn with black India ink on separate sheets of glossy white paper and be suitable for photographic reproduction. Hand inserted symbols should be well-spaced and legible; unusual symbols and complicated combinations of symbols should be avoided. Acknowledgments of grant support should be placed after the references, which should be in alphabetical–chronological order. References to articles and books should be written in the standard form with the standard abbreviations established by the Mathematical Reviews.

Contents

	PAGE
On the Functional Calculus of Contractions with Nonvanishing Unitary Asymptotes <i>L. Kérchy</i>	323
Some Results about the Space $A^{-\infty}$ of Analytic Functions <i>J. Arias de Reyna & Antonio J. Duran</i>	339
Résolution de $\bar{\partial}$ sur des Portions de Sphères ou d'Anneaux <i>Liliane Bitar</i>	347
Complex Analytic Curves of Minimal Area in Cubes <i>Evgeny A. Poletsky</i>	357
Support Sets and Gleason Parts <i>Paul Budde</i>	367
Moduli Spaces of Polynomial Immersions between Complex Projective Spaces <i>G. Toth</i>	385
Discrete Quasiconformal Groups with Small Dilatation <i>M. Jean McKemie</i>	397
A Monotone Slit Mapping with Large Logarithmic Derivative <i>Tom Carroll</i>	409
A Probabilistic Zero Set Condition for the Bergman Space <i>Emile LeBlanc</i>	427
A Hypercontractive Estimate for the Heat Semigroup on \mathbf{P}^2 <i>J. Michael Pearson</i>	439
An Approximation Theorem for Szegő Kernels and Applications <i>Hyeonbae Kang</i>	447
On the Quasidiagonality of Direct Sums of Normal Operators and Shifts <i>Laurent Marcoux</i>	459
Semicocycles and Weighted Composition Semigroups on H^p <i>Wolfgang König</i>	469
Index	477
