CONTENTS

Wm. P. Brown
An algebra related to the orthogonal group . . . . . .

R. K. Ritt
A generalization of inner product . . . . . .

R. C. Lyndon
A theorem of Friedrichs . . . . . .

A. Dvoretzky and P. Erdös
On power series diverging everywhere on the circle of convergence . . .

Frank Harary
On local balance and N-balance in signed graphs . . . . . .

Wilfred Kaplan
Approximation by entire functions . . . . . .

Rolf Nevanlinna
A remark on differentiable mappings . . . . . .

Maxwell O. Reade
On close-to-convex univalent functions . . . . . .

A. J. Lohwater and G. Piranian
On a conjecture of Lusin . . . . . .

Fritz Herzog and George Piranian
Some point sets associated with Taylor series . . . . . .

F. Bagemihl and W. Seidel
Functions of bounded characteristic with prescribed ambiguous points .

George Piranian
The derived sets of a linear set . . . . . .

R. V. Churchill
Generalized finite Fourier cosine transforms . . . . . .

Charles Standish
On the representation of a function by a Poisson transform . . . . . .

The Michigan Mathematical Journal is published by the University o
Press, Ann Arbor, Michigan, U. S. A. Each volume consists of two issue
100 pages each. The price per issue is $4, on direct orders from individua
on all other orders.
