

THE BRITISH JOURNAL FOR THE PHILOSOPHY OF SCIENCE

EDITOR G. M. K. Hunt

The British Journal for the Philosophy of Science has, since 1951, established itself as the leading international journal in its field. It is the official organ of the British Society for the Philosophy of Science and as such benefits from the patronage of this prestigious organization. It aims to study the logic, method, and philosophy of science as well as the various special sciences including the social sciences. It is of interest to all research workers and teachers concerned with the principles and methods of their own and related subjects.

Papers and discussions come from a wide range of disciplines including Philosophy, History, Mathematics, Physics, Chemistry, Biology, Astronomy, Computing, Economics, Sociology, Anthropology, Psychology, and Medicine. Contributors are encouraged to write in a way that makes the subject both informative and appealing.

Contributions include

Some Empirical Considerations for Observation and Theory
Classical and Bayesian Regression Analysis
The Evolution of Natural Laws
Natural Necessity and Laws of Nature
On Consensus and Stability in Science
Metaphysics, Economics, and Progress
Experimental Evidence vs. Experimental Practice

Subscription rates for Volume 44 1993 (4 issues)

CALL FOR PAPERS

LOGIC AND THE WORKINGS OF THE MIND: RAMUS TO KANT

The Philosophy Department at the University of Western Ontario, with the assistance of the Social Sciences and Humanities Research Council of Canada, will be hosting a conference on the relation between logic, epistemology and "faculty psychology" in early modern philosophy in June, 1995. Papers are solicited on topics exploring the influence of early modern logic on early modern philosophy, or early modern "faculty psychology" on early modern logic. Topics could include, but are not restricted to: abstraction of concepts from sensory experience and debates over the nature and status of abstract ideas; accounts of conceptual clarity/obscurity, distinctness/confusion and their influence; accounts of the repugnance and comparison of ideas and their relation to theories of logical truth and contingency; relation between notions of conceivability/inconceivability and possibility/impossibility in early modern logic and philosophy; accounts of necessity and contingency and their relation to *a priori* and *a posteriori* modes of knowing, or treatments of the work of particular early modern logicians. Regardless of topic, papers should be primarily focused on the content of early modern logic text books.

For more information contact Thomas M. Lennon, Early Modern Logic Project, Philosophy Department, University of Western Ontario, London, Canada, N6A 3K7 or send e-mail to Lorne Falkenstein (LFalkens@uwovax.uwo.ca).

Submission deadline: September 1, 1994.

GUIDE TO AUTHORS

The *Journal* aims to provide a common ground where both philosophers and mathematicians can read and publish original and significant work in all areas of philosophical and mathematical logic, as well as the philosophy of language, and the philosophy, history, and foundations of mathematics.

Manuscripts should be sent in triplicate to **Editors, P.O. Box 5, Notre Dame, Indiana 46556, U.S.A.** Manuscripts are accepted for review with the understanding that the same work has not been and will not be published elsewhere, nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further that any person cited as a source of personal communications has approved such citation. Authors will be requested to sign a transfer of copyright to the *Notre Dame Journal of Formal Logic* so that the authors and publishers may be protected from misuse of copyrighted material even during the review process.

Form of Manuscript. All manuscripts must be typewritten in English, **double-spaced** (including notes and references) on one side of $8\frac{1}{2} \times 11$ inch or A4 white paper with 1 inch margins on all sides. To facilitate blind review by one or more readers, all indications of authorship should appear on a detachable cover page only. Handwritten symbols, non-Roman characters, and ambiguous symbols (1 vs. l, o vs. O and 0) should be identified in the margin.
