

NOTRE DAME JOURNAL OF FORMAL LOGIC

VOLUME 27, 1986

VOLUME CONTENTS

Avron, Arnon , On purely relevant logics	180–194
Avron, Arnon , On an implication connective of RM	201–209
Baaz, Matthias , Kripke-type semantics for Da Costa's paraconsistent logic C_w	523–527
Barwise, Jon , Information and circumstance	324–338
Bencivenga, Ermanno , Analyticity and analytical truth	14–19
Bencivenga, Ermanno and Karel Lambert , A free logic with simple and complex predicates	247–256
Blass, Andreas , Near coherence of filters, I: Cofinal equivalence of models of arithmetic	579–591
Broesterhuizen, Guus and J. Wierzejewski , Identities and indiscernibility	592–605
Bruce, Kim B. , Model constructions in stationary logic. II: Definable ultrapowers	257–262
Butrick, Richard , Systems of sentence logic with trans-atomic units	565–571
Clark, Romane , Predication and paronymous modifiers	376–392
Cohen, Daniel H. , A new axiomatization of Belnap's conditional assertion	124–132
Daniels, Charles , A story semantics for implication	221–246
Dau, Paolo , Russell's first theory of denoting and quantification	133–166
Dougherty, Daniel J. , Gentzen systems, resolution, and literal trees	483–503
Dywan, Zdzislaw , A new variant of the Gödel-Malcev theorem for the classical propositional calculus and correction to my paper—The connective of necessity of modal logic S_5 is metalogical	551–555
Engelbretsen, George , Czeżowski on wild quantity	62–65
Engelbretsen, George , Singular/general	104–107

Farrell, Robert J. , Implication and presupposition	51–61
Fine, Kit , Analytic implication	169–179
Fitting, Melvin , Notes on the mathematical aspects of Kripke's theory of truth	75–88
Fodor, J. A. , Information and association	307–323
Font, Josep M. , Modality and possibility in some intuitionistic modal logics	533–546
Forrest, Peter , The logic of free acts and the powers of God	20–38
Harkleroad, Leon , Iterated images on manifolds	89–92
Harrah, David , Message semantics	339–348
Kaufmann, Matt, and Saharon Shelah , The Hanf number of stationary logic	111–123
Krabbe, E. C. W., D. van Dalen, H. Mulder, and A. Visser , Finite Kripke models of HA are locally PA	528–532
Krom, Melven , A linearly ordered topological space that is not normal	12–13
Lambert, Karel and Ermanno Bencivenga , A free logic with simple and complex predicates	247–256
McCarty, Charles , Subcountability under realizability	210–220
McKay, Thomas , His burning pants	393–400
Mekler, Alan H. and Saharon Shelah , Stationary logic and its friends II	39–50
Mortensen, Chris , Reply to Burgess and to Read	195–200
Mulder, H., D. van Dalen, E. C. W. Krabbe, and A. Visser , Finite Kripke models of HA are locally PA	528–532
Salmon, Nathan , Reflexivity	401–429
Schumm, George F. , Some failures of interpolation in modal logic	108–110
Segerberg, Krister , Modal logics with functional alternative relations	504–522
Shelah, Saharon and Charles Steinhorn , On the nonaxiomatizability of some logics by finitely many schemas	1–11
Shelah, Saharon and Alan H. Mekler , Stationary logic and its friends II	39–50

Shelah, Saharon and Matt Kaufmann , The Hanf number of stationary logic	111–123
Shelah, Saharon , On power of singular cardinals	263–299
Soames, Scott , Incomplete definite descriptions	349–375
Statman, Richard , Solving functional equations at higher types; some examples and some theorems	66–74
Steinhorn, Charles and Saharon Shelah , On the nonaxiomatizability of some logics by finitely many schemas	1–11
Thompson, Bruce E. R. , Syllogisms with statistical quantifiers	93–103
Troelstra, A. S. , Strong normalization for typed terms with surjective pairing	528–532
van Dalen, D., H. Mulder, E. C. W. Krabbe, and A. Visser , Finite Kripke models of HA are locally PA	528–532
Visser, A, D. van Dalen, H. Mulder, and E. C. W. Krabbe , Finite Kripke models of HA are locally PA	523–527
Wagner, Steven J. , California semantics meets the great fact	430–455
Weir, Alan , Classical harmony	459–482
Wierzejewski, J. and Guus Broesterhuizen , Identities and indiscernibility	592–605
Zanardo, Alberto , On the characterizability of the frames for the “Unpreventability of the present and the past”	556–564
Zuckerman, Martin M. , Sums of finitely many ordinals of various kinds	572–578
