Note on definitional reductions. By *Jonathan F. Seldin*. 4

Ontology in the *Tractatus* of Wittgenstein. By *Roman Suszko* . . 7

The Rule of Pierce. By *Ivo Thomas* 34

Creative sequences and double sequences. By *Sr. M. Adrian Carpentier, O.S.U.*. 35

Some proofs on relative completeness in modal logic. By *M. J. Cresswell* 62

A philosophical remark on Gödel's unprovability of consistency proof. By *Francesca Rivetti Barbò* 67

Completeness without the Barcan formula. By *M. J. Cresswell.* 75

Normal form generation of S5 functions via truth functions. By *Gerald J. Massey* 81

On provable recursive functions. By *H. B. Engerton* 86

A note on the arithmetical hierarchy. By *Stephen L. Bloom* . . . 89

On the Leibnizian modal system. By *Setsuo Saito* 92

Modal logics with two kinds of necessity and possibility. By *Paul Weingartner* 97

On propositional, truth and Boolean functions. By *Tudor Ristea* 160

Syntactically free, semantically bound. By *Hugues Leblanc* . . . 167

An infixed, punctuation-free notation. By *W. C. Wilcox* and *R. D. Carnes* 171

Propositional logic in the sixteenth and early seventeenth centuries. By *E. J. Ashworth* 179

Results regarding the axiomatization of partial propositional calculi. By *W. E. Singletary* 193

Equational logic. By *C. A. Meredith* and *A. N. Prior*. 212

Petrus Fonseca and material implication. By *E. J. Ashworth*. . 227

The middle term. By *Sibajiban* 229

Towards a logic of significance. By *Leonard Goddard* 233

Modified strong reduction in combinatory logic. By *Kenneth Loewen* 265

A standardization theorem for strong reduction. By *Kenneth Loewen* 271

Note on duality in propositional calculus. By *Chandler Works* and *Wolfgang Yourgrau* 284

On Kleene's recursive realizability as an interpretation for intuitionistic elementary number theory. By *Robert R. Tomkins* 289

The propositional calculus **MC** and its modal analog. By *J. Jay Zeman* 294

The Church Rosser theorem for strong reduction in combinatory logic. By *Kenneth Loewen* 299

A note on the structure of the power set. By *G. F. Schumm* . . . 303

Approximation to a decision procedure for the halting problem. By *Michael Anderson* 305

The logical concept of existence. By *John T. Kearns* 313

Logical continuity. By *Hugh S. Chandler* 325

On explanation of number progression. By *Chung-ying Chang* . . 329

A note on theses of the first-order functional calculus. By *Juliusz Reichbach* 335

On symbolizing singulary S5 functions. By *John Thomas Canty* . 340

Definitional Boolean calculi. By *Richard Cole* 343

The shortest axioms of the implicational calculus. By *Richard Tursman* 351

Propositional sequence-calculi for inconsistent systems. By *Andrés R. Raggio* 359

A first order type theory for the theory of sets. By *Fred Coppotelli* 367

Examination of the axiomatic foundations of a theory of change. I. By *Laurent Larouche* 371

Incompleteness of a logic of Routley's. By *A. Trew* 385

Correction to my paper "Some completeness results for intermediate propositional logics". By *C. S. McKay* 388

NOTRE DAME JOURNAL OF FORMAL LOGIC

GUIDE TO AUTHORS SUBMITTING ARTICLES FOR PUBLICATION

Articles are invited for publication in the Journal, which are devoted to symbolic logic and its applications, to metalogic, semantics, the foundations of mathematics, to the history of logic and to the fields immediately related to logic. Articles and all editorial correspondence should be sent to B. Sobociński, Editor, Box 28, University of Notre Dame, Notre Dame, Indiana 46556, U.S.A.

All manuscripts of articles for publication in the Journal should be typewritten with wide margin and wide spacing between lines. Particular care should be taken to allow sufficient space between lines containing subscripted and superscripted symbols. All footnotes should be numbered consecutively and typed with wide spacing at the end of the article; footnotes may appear in print at the bottom of the appropriate pages, but should nevertheless be submitted in this form. A footnote which acknowledges a debt of the author to a foundation grant or individuals should be given with an asterisk for reference. All references should be listed at the end of the article after the footnotes, numbered consecutively and typed with wide spacing between lines.

It is acceptable to write in special symbols normally not available on a typewriter. However, authors should be careful to supply a list or description of special symbols for the printer and should underline various types of symbols in different colors throughout the manuscript, e.g. red for Greek letters, green for Gothic letters, etc. It is suggested that author's refer to back issues of the Journal for examples of the style of composition. Reference to the use of special symbols in such articles will facilitate composition and can be given in the instructions to the printer.

Authors are generally given proof sheets for correcting errors that occur in composition. However, any special composition costs arising out of an author's revision of text of an article in proof will be charged to the author.

Authors will receive fifty reprints of each article and additional reprints or covers for reprints may be purchased.
