

NIHONKAI MATHEMATICAL JOURNAL

Vol. 28, No. 2 (2017)

Contents

Koji FURUTA:
Integral representations of positive definite functions on convex sets of certain semigroups of rational numbers 79

Kazushi KOMATSU:
The squared chain length function of 5 or 6-membered straight-chains with the tetrahedral bond angle 89

Hisao YOSHIHARA:
A note on Galois embedding and its application to \mathbb{P}^n 99

Tomonari SUZUKI:
Comments on some recent existence theorems of best proximity points for Kannan-type and Chatterjea-type mappings 105

Hansong HUANG and Kou Hei IZUCHI:
Cyclic vectors in Fock-type spaces of single variable 117

Yukino TOMIZAWA:
The von Neumann-Jordan constant of $\pi/2$ -rotation invariant norms on \mathbb{R}^2 125

Hui YU, Koichiro IKE, Yuto OGATA, Yutaka SAITO and Tamaki TANAKA:
Computational methods for set-relation-based scalarizing functions 139
