Nagoya Mathematical Journal is the official journal of the Graduate School of Mathematics, Nagoya University, designed solely for the publication of research papers. However, invited papers and other original papers in mathematics from all over the world are also regularly published in Nagoya Mathematical Journal. Currently, 4 volumes are published each year.

All manuscripts should be typewritten in English, French, or German. Papers should be prepared using $\text{T}_{\text{E}}\text{X}$ if possible, but only the printed hard copy should be submitted (2 copies). Authors submitting old-fashioned typescript are requested to clearly distinguish special symbols and letters such as bold-face, script, German and Greek letters. The editors may request the original $\text{T}_{\text{E}}\text{X}$ files of papers accepted for publication. The journal's $\text{L}_{\text{A}}\text{T}_{\text{E}}\text{X}$ style file and its manual can be obtained from the following URL.

<http://www.math.nagoya-u.ac.jp/nmj/index.html>

Papers should include

- (a) a short abstract of the contents,
- (b) classification numbers at the foot of page 1 according to the 2000 Mathematics Subject Classification, to be found in

<http://www.ams.org/>,

- (c) the author's coordinates, including e-mail address and Fax numbers,
- (d) for papers with long titles, the author's choice of running head (not longer than 50 characters).

As soon as we receive a manuscript, a receipt will be sent to the author. The receipt, however, does not mean anything regarding the acceptability of the paper for publication. If the editorial committee has decided to accept a paper, the author will receive a notice containing the number of the volume in which the paper will appear.

Authors submitting a joint paper must provide instructions as to which author is responsible for proof-reading (only one set of proofs will be provided). Each author, as well as each co-author will have 50 reprints.

The manuscript and general correspondence should be addressed to: Managing editor, Nagoya Mathematical Journal, Graduate School of Mathematics, Nagoya University, Chikusa-ku, Nagoya, 464-8602, Japan.

CONTENTS

Kumpera, A. and Rubin, J.L.: Multi-flag systems and ordinary differential equations	1
Tomita, K. and Yamamuro, K.: Lower bounds for fundamental units of real quadratic fields	29
Ihara, S. and Kubo, M.: The asymptotics of string matching probabilities for Gaussian random sequences	39
Shimomura, S.: Oscillation results for n -th order linear differential equations with meromorphic periodic coefficients	55
Mai, J. and Ye, X.: The structure of pointwise recurrent maps having the pseudo orbit tracing property	83
Ichihara, K.: Birth and death processes in randomly fluctuating environments	93
Tsuji, H.: Deformation invariance of plurigenera	117
Inaba, M.: On the moduli of stable sheaves on a reducible projective scheme and examples on a reducible quadric surface	135
Sano, Y.: On purely periodic beta-expansions of Pisot numbers	183
