

## ACKNOWLEDGEMENTS

The editors gratefully acknowledge the service of the following persons who have been consulted concerning the preparation of volumes one hundred sixty-six through one hundred seventy of the Pacific Journal of Mathematics.

Jonathan L. Alperin, W.A. Al-Salam, Bill Bade, Chungsheng Ban, M. Bestvina, Bruce Berndt, Christopher Bishop, Antonia Blucher, Jose Bonet, David Boyd, Robert Brown, P.L. Butzer, Richard Canary, V. Chari, Kieko Chiba, F. Michael Christ, Marie Choda, Ralph Cohen, J. Brian Conrey, John D'Angelo, Pierre de la Harpe, Dennis DeTurck, Peter Duren, A.G. Earnest, N. Ercolani, E. Fadell, Thomas Farrell, Burton Fein, R.A. Gangolli, Dan Gordon, Loukas Grafakos, Frederick P. Greenleaf, Nathan Habegger, Marc Hindry, Gerhard Huisken, D. Husemoller, Barry Johnson, Y. Kawahigashi, Monique Lejeune-Jalabert, Gary Lieberman, Ron Lipsman, Darren Long, Robert Maier, Nelson G. Markley, Bernard Maskit, Darren McCullough, Maurice Mignotte, Lee D. Mosher, A. Moy, Amos Nevo, Victor Nistor, Edward Odell, Ulrich Oertel, A. Pajor, R. Parimala, Thomas Peternell, Robert R. Phelps, David Pitts, Arnold K. Pizer, Claudio Procesi, Florin Radulescu, Doug Ravenel, Jean Renault, Roger W. Richardson, Jr., Marc Rieffel, H.L. Royden, Leslie Saper, Martin Scharlemann, Thomas Schlumprecht, David Siegel, Nat Smale, Robert Stanton, Michio Suzuki, Luen-fai Tam, J. Taylor, Morwen Thistlethwaite, Jim Vance, V.S. Varadarajan, L.N. Vaserstein, Claire Voisin, Nolan Wallach, John Walsh, S. Weinberger, Hans Wenzl, S.S.-T. Yau, A. Zdurik, Bob Zimmer.

## PREPARATION OF MANUSCRIPTS

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form, double spaced with large margins. The first paragraph must be capable of being used separately as an abstract of the entire paper. In particular, it should not contain any bibliographic references. Please classify the paper according to the Mathematics Subject Classification scheme which can be found in the December index volumes of *Mathematical Reviews*. Supply the name, address and e-mail address of the author to whom correspondence should be sent. Manuscripts, in triplicate, may be sent to any one of the editors. All other communication should be addressed to Julie Honig, Department of Mathematics, University of California, Los Angeles, CA 90095-1555 (e-mail: julie@math.ucla.edu).

After a paper is accepted for publication, the corresponding author will be asked by the Managing Editor's office to submit to it the TeX file of the paper, if one is available. The file may be transmitted by e-mail or mailed in floppy diskette form. Page proofs will be mailed to the corresponding author.

## OFFPRINTS

The corresponding authors will receive 100 free offprints within a month after the paper is published. An offprint order form will be sent to the corresponding author so that additional offprints may be purchased.

## PAGE CHARGES

To cover part of the cost of publication, a bill for page charges will be sent to the corresponding author. Authors are expected to pay these charges from their research or institutional funds. In no case is an author personally responsible for paying page charges.

## CONTENTS

<b>E. Amar, J. Bruna and A. Nicolau</b> , On $H^p$ -solutions of the Bezout equation .....	297
<b>C. Anantharaman-Delaroche</b> , Amenable correspondences and approximation properties for von Neumann algebras .....	309
<b>V. Ancona and G. Ottaviani</b> , On moduli of instanton bundles on $\mathbb{P}^{2n+1}$ .....	343
<b>J. Berglund and W. Rossmann</b> , Minimal surfaces with catenoid ends .....	353
<b>P. Biane</b> , Permutation model for semi-circular systems and quantum random walks .....	373
<b>R.M. Brown</b> , The Neumann problem on Lipschitz domains in Hardy spaces of order less than one .....	389
<b>R.A. Herb</b> , Matching theorems for twisted orbital integrals .....	409
<b>A.J. Izzo</b> , Uniform algebras generated by holomorphic and pluriharmonic functions on strictly pseudoconvex domains .....	429
<b>N. Jing and J. Zhang</b> , Quantum Weyl algebras and deformations of $U(\mathfrak{g})$ .....	437
<b>S. Louboutin</b> , Calcul du nombre de classes des corps de nombres .....	455
<b>P. Mattila and P.V. Paramonov</b> , On geometric properties of harmonic $Lip_1$ -capacity .....	469
<b>B. Ørsted and G. Zhang</b> , Reproducing kernels and composition series for spaces of vector-valued holomorphic functions .....	493
<b>S.E. Rao</b> , Iterated loop modules and a filtration for vertex representation of toroidal Lie algebras .....	511
<b>M. Schechter</b> , The intrinsic mountain pass .....	529
<b>R.G. Wang</b> , A Frobenius problem on the knot space .....	545
<b>DaGang Yang</b> , On complete metrics of nonnegative curvature on 2-plane bundles .....	569
<b>Errata</b> .....	585
<b>Errata</b> .....	589
