CONTENTS

Ralph Palmer Agnew, *Ratio tests for convergence of series* 1
T. M. Apostol, *On the Lerch zeta functions* 161
Richard Arens and James Dugundji, *Topologies for function spaces* 5
B. H. Arnold, *Distributive lattices with a third operation defined* 33
R. A. Beaumont and H. S. Zuckerman, *A characterization of the subgroups of the additive rationals* 169
Richard Bellman and Theodore Harris, *Recurrence times for the Ehrenfest model* ... 179
R. H. Bing, *Concerning hereditarily indecomposable continua* 43
R. P. Boas, Jr., *Completeness of sets of translated cosines* 321
J. L. Brenner, *Matrices of quaternions* 329
R. H. Bruck, *Loops with transitive automorphism groups* 481
E. D. Cashwell, *The asymptotic solutions of an ordinary differential equation in which the coefficient of the parameter is singular* 337
David B. Dekker, *Generalizations of hypergeodesics* 53
S. P. Diliberto and E. G. Straus, *On the approximation of a function of several variables by the sum of functions of fewer variables* 195
J. Dugundji, *An extension of Tietze's theorem* 353
James Dugundji and Richard Arens, see Richard Arens
A. Dvoretzky, A. Wald, and J. Wolfowitz, *Relations among certain ranges of vector measures* 59
A. Erdélyi and F. G. Tricomi, see F. G. Tricomi
P. Erdös, F. Herzog, and G. Piranian, *Schlicht Taylor series whose convergence on the unit circle is uniform but not absolute* 75
Wilhelm Fischer, *On Dedekind's function $\eta(\tau)$* 83
P. R. Garabedian, *A partial differential equation arising in conformal mapping* 485
Theodore Harris and Richard Bellman, see Richard Bellman
John G. Herriot, *The polarization of a lens* 369
F. Herzog, P. Erdös, and G. Piranian, see P. Erdös
Magnus R. Hestenes, *Applications of the theory of quadratic forms in Hilbert space to the calculus of variations* 525
J. D. Hill, *The Borel property of summability methods* 399
I. I. Hirschman, Jr. and D. V. Widder, *Convolution transforms with complex kernels* .. 211
Sze-Tsen Hu, *On the realizability of homotopy groups and their operations* 583
Irving Kaplansky, *A theorem on rings of operators* 227
W. Karush, *An iterative method for finding characteristic vectors of a symmetric matrix* 233
Werner Leutert, *The heavy sphere supported by a concentrated force* 97
G. G. Lorentz, *On the theory of spaces Λ* 411

Henry B. Mann, *On the number of integers in the sum of two sets of positive integers* 249
W. R. Mann and J. H. Roberts, see J. H. Roberts
W. H. Mills, *A theorem on the representation theory* 255
Ivan Niven and H. S. Zuckerman, *On the definition of normal numbers* 103
L. J. Paige, *Complete mappings of finite groups* 111
G. Piranian, P. Erdös, and F. Herzog, see P. Erdös
Tibor Radó, *An approach to singular homology theory* 265
J. H. Roberts and W. R. Mann, *On a certain nonlinear integral equation of the Volterra type* 431
E. G. Straus and S. P. Diliberto, see S. P. Diliberto
Otto Szász, *On a Tauberian theorem for Abel summability* 117
Otto Szász, *On some trigonometric transforms* 291
Olga Taussky, *Classes of matrices and quadratic fields* 127
F. G. Tricomi and A. Erdélyi, *The asymptotic expansion of a ratio of gamma functions* 133
W. R. Utz, *A note on unrestricted regular transformations* 447
A. Wald, A. Dvoretzky, and J. Wolfowitz, see A. Dvoretzky
Stanley S. Walters, *Remarks on the space* H^p 455
Hsien-Chung Wang, *Two theorems on metric spaces* 473
J. G. Wendel, *On isometric isomorphism of group algebras* 305
G. M. Wing, *On the* L^p *theory of Hankel transforms* 313
Hassler Whitney, *On totally differentiable and smooth functions* 143
J. Wolfowitz, A. Dvoretzky, and A. Wald, see A. Dvoretzky
H. S. Zuckerman and R. A. Beaumont, see R. A. Beaumont
H. S. Zuckerman and Ivan Niven, see Ivan Niven

AMERICAN MATHEMATICAL SOCIETY
HUGHES AIRCRAFT COMPANY

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be typewritten (double spaced), and the author should keep a complete copy. Manuscripts may be sent to any of the editors. Manuscripts intended for the outgoing editors should be sent to their successors. All other communications to the editors should be addressed to the managing editor, E.G. Straus, at the University of California Los Angeles 24, California.

50 reprints of each article are furnished free of charge; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published quarterly, in March, June, September, and December. The price per volume (4 numbers) is $12.00; single issues, $3.50; back numbers (Volumes 1, 2, 3) are available at $2.50 per copy. Special price to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: $4.00 per volume; single issues, $1.25.

Subscriptions, orders for back numbers, and changes of address should be sent to the publishers, University of California Press, Berkeley 4, California.

Printed at Ann Arbor, Michigan. Entered as second class matter at the Post Office, Berkeley, California.

* To be succeeded in 1955, by H.L. Royden, Stanford University, Stanford, California.

** To be succeeded in 1955, by E.G. Straus, University of California, Los Angeles 24, Calif.
