

CONTENTS

M. Boyle and D. Handelman, Entropy versus orbit equivalence for minimal homeomorphisms	1
T. Dobrowolski and L. R. Rubin, The hyperspaces of infinite-dimensional compacta for covering and cohomological dimension are homeomorphic	15
J. Fox and P. Haskell, The index of transversally elliptic operators for locally free actions	41
M. Hirabayashi, Unit indices of some imaginary composite quadratic fields . . .	87
E. C. Keppelmann, Periodic points on nilmanifolds and solvmanifolds	105
M. J. Spurr, Branched coverings of surfaces with ample cotangent bundle	129
A. Stone, Evolutionary existence proofs for the pendant drop and n-dimensional catenary problems	147
N. Weaver, Lattices of Lipschitz functions	179
Errata	195
