

## CONTENTS

A. Adler, Characterization of modular correspondences by geometric properties . . . . .	1
S. A. Argyros and I. Delianni, Representations of convex non-dentable sets . . . . .	29
C.-H. Chu and H. B. Cohen, Isomorphisms of spaces of continuous affine functions . . . . .	71
F. L. Hernández and C. Ruiz, Universal classes of Orlicz function spaces . . . . .	87
K.-T. Kim, Asymptotic behavior of the curvature of the Bergman metric of the thin domains . . . . .	99
C. Lanski, Quadratic central polynomials with derivation and involution . . . . .	111
J. Lin, Nonsplit ring spectra and products of $\beta$ -elements in the stable homotopy of Moore spaces . . . . .	129
D. A. McLaughlin, Orientation and string structures on loop space . . . . .	143
C. Pasnicu, Homomorphisms of Bunce-Deddens algebras . . . . .	157
S. Zhang, Certain $C^*$ -algebras with real rank zero and their corona and multiplier algebras. Part I . . . . .	169
M. Eastwood and A. Pilato, Correction to "On the density of twistor elementary states" . . . . .	199
