CONTENTS

A – ALGEBRA AND NUMBER THEORY

H. Z. Chuan, <i>Note on the inequality of the arithmetic and geometric means</i>	43
P. Fleischmann and J. C. Jantzen, <i>Simple periodic modules of twisted Chevalley groups</i>	229
J. C. Jantzen, See P. Fleischmann and J. C. Jantzen	
L. Panaitopol and D. Ştefănescu, <i>On the generalized difference polynomials</i>	341
D. Ştefănescu, See L. Panaitopol and D. Ştefănescu	

B – ANALYSIS

W. Bergweiler, <i>On the fix-points of composite functions</i>	1
N. Grønbaek, <i>Amenability of discrete convolution algebras, the commutative case</i>	243
P.-K. Lin, <i>The isometries of $H^\infty(E)$</i>	69
J. J. Moloney, <i>Residue class domains of the ring of convergent sequences and of $C^\infty([0, 1], \mathbf{R})$</i>	79
T. Murai, <i>The power $3/2$ appearing in the estimate of analytic capacity</i>	313
Z.-J. Ruan, <i>The structure of pure completely bounded and completely positive multilinear operators</i>	155
W. M. Ruess and W. H. Summers, <i>Weakly almost periodic semi-groups of operators</i>	175
W. H. Summers, See W. M. Ruess and W. H. Summers	
R. Szwarc, <i>Banach algebras associated with spherical representations of the free group</i>	201
A. Ülger, <i>Arens regularity sometimes implies the RNP</i>	377

C – APPLIED MATHEMATICS

G. Ströhmer, <i>About compressible viscous fluid flow in a bounded region</i>	359
---	-----

D – GEOMETRY

A. Biancofiore, M. L. Fania, and A. Lanteri, <i>Polarized surfaces with hyperelliptic sections</i>	9
C. Borcea, <i>Deforming varieties of k-planes of projective complete intersections</i>	25
G. Corach, H. Porta, and L. Recht, <i>Differential geometry of systems of projections in Banach algebras</i>	209
M. L. Fania, See A. Biancofiore, M. L. Fania, and A. Lanteri	
W. Kucharz, <i>Global almost analytic algebraicity of analytic sets</i> .	287
A. Lanteri, See A. Biancofiore, M. L. Fania, and A. Lanteri	
H. Porta, See G. Corach, H. Porta, and L. Recht	
L. Recht, See G. Corach, H. Porta, and L. Recht	
G. Schwarz, <i>A pretender to the title “Canonical Moebius strip”</i> . .	195
K. Shiohama, T. Shioya, and M. Tanaka, <i>Mass of rays on complete open surfaces</i>	349
T. Shioya, See K. Shiohama, T. Shioya, and M. Tanaka	
M. Tanaka, See K. Shiohama, T. Shioya, and M. Tanaka	

E – LOGIC AND FOUNDATIONS

J. W. L. Merrill, <i>A class of consistent anti-Martin’s axioms</i>	301
---	-----

G – TOPOLOGY

M. Brown, <i>Fixed points for orientation preserving homeomorphisms of the plane which interchange two points</i>	37
N. H. V. Hung, <i>The mod 2 equivariant cohomology algebras of configuration spaces</i>	251

H – COMBINATORICS

P. H. Edelman and D. White, <i>Codes, transforms and the spectrum of the symmetric group</i>	47
D. White, See P. H. Edelman and D. White	

Pacific Journal of Mathematics

W. Bergweiler , On the fix-points of composite functions	1
A. Biancofiore, M. L. Fania, and A. Lanteri , Polarized surfaces with hyperelliptic sections	9
C. Borcea , Deforming varieties of k -planes of projective complete intersections .	25
M. Brown , Fixed points for orientation preserving homeomorphisms of the plane which interchange two points	37
H. Z. Chuan , Note on the inequality of the arithmetic and geometric means . . .	43
P. H. Edelman and D. White , Codes, transforms and the spectrum of the symmetric group	47
P.-K. Lin , The isometries of $H^\infty(E)$	69
J. J. Moloney , Residue class domains of the ring of convergent sequences and of $C^\infty([0, 1], \mathbf{R})$	79
Z.-J. Ruan , The structure of pure completely bounded and completely positive multilinear operators	155
W. M. Ruess and W. H. Summers , Weakly almost periodic semigroups of operators	175
G. Schwarz , A pretender to the title "Canonical Moebius strip"	195
R. Szwarc , Banach algebras associated with spherical representations of the free group	201

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced (not dittoed), double spaced with large margins. Please do not use built up fractions in the text of the manuscript. However, you may use them in the displayed equations. Underline Greek letters in red, German in green, and script in blue. The first paragraph must be capable of being used separately as a synopsis of the entire paper. In particular it should contain no bibliographic references. Please propose a heading for the odd numbered pages of less than 35 characters. Manuscripts, in triplicate, may be sent to any one of the editors. Please classify according to the 1980 *Mathematics Subject Classification* (1985 Revision) scheme which can be found in the December index volumes of *Mathematical Reviews*. Supply name and address of author to whom proofs should be sent. All other communications should be addressed to the managing editor, or Elaine Barth, University of California, Los Angeles, California 90024-1555-05.

There are page-charges associated with articles appearing in the Pacific Journal of Mathematics. These charges are expected to be paid by the author's University, Government Agency or Company. If the author or authors do not have access to such Institutional support these charges are waived. Single authors will receive 50 free reprints; joint authors will receive a total of 100 free reprints. Additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is issued monthly as of January 1966. Regular subscription rate: \$190.00 a year (6 Vols., 12 issues). Special rate: \$95.00 a year to individual members of supporting institutions.

Subscriptions, orders for numbers issued in the last three calendar years, and changes of address should be sent to Pacific Journal of Mathematics, P.O. Box 969, Carmel Valley, CA 93924, U.S.A. Old back numbers obtainable from Kraus Periodicals Co., Route 100, Millwood, NY 10546.

The Pacific Journal of Mathematics at P.O. Box 969, Carmel Valley, CA 93924 (ISSN 0030-8730) publishes 6 volumes per year. Second-class postage paid at Carmel Valley, California 93924, and additional mailing offices. Postmaster: send address changes to Pacific Journal of Mathematics, P.O. Box 969, Carmel Valley, CA 93924.
