

# CONTENTS

## A – ALGEBRA AND NUMBER THEORY

K. Alladi, <i>Moments of additive functions and the sequence of shifted primes</i> .....	261
J. L. Brenner, <i>Composition algebras of polynomials</i> .....	281
P. Erdős and A. Sárközy, <i>Problems and results on additive properties of general sequences. I</i> .....	347
D. Estes, R. Guralnick, M. Schacher and E. Straus, <i>Equations in prime powers</i> .....	359
B. Gordon, D. Sato and E. Straus, <i>Binomial coefficients whose products are perfect <math>k</math>th powers</i> .....	393
A. W. Hales, <i>Stable augmentation quotients of abelian groups</i> .....	401
D. L. Hilliker, <i>An algorithm for computing the values of the ramification index in the Puiseux series expansions of an algebraic function</i> .....	427
G. Kolesnik, <i>Primes of the form <math>[n^c]</math></i> .....	437
J. C. Lagarias, <i>The set of primes dividing the Lucas numbers has density <math>2/3</math></i> .....	449
E. Lehmer, <i>On special primes</i> .....	471
M. Newman, <i>Sums of squares of matrices</i> .....	497
K. Rogers and E. G. Straus, <i>Infinitely integer-valued polynomials over an algebraic number field</i> .....	507
D. Sato, <i>Utterly integer valued entire functions (I)</i> .....	523
A. Schinzel, <i>Reducibility of polynomials in several variables. II</i> .....	531
R. Steinberg, <i>Finite subgroups of <math>SU_2</math>, Dynkin diagrams and affine Coxeter elements</i> .....	587
O. Taussky, <i>Ideal matrices. III</i> .....	599

## B – ANALYSIS

A. M. Bruckner, M. Rosenfeld and L. A. Rubel, <i>The Darboux property and solutions of algebraic differential equations</i> .....	295
A. S. Cavaretta, Jr., A. Sharma and R. S. Varga, <i>A theorem of J. L. Walsh, revisited</i> .....	313
P. Lockhart and E. G. Straus, <i>Relations between the maximum modulus and maximum term of entire functions</i> .....	479
E. Mues and R. Redheffer, <i>Über eine Differentialgleichung <math>m</math>-ter Ordnung im Komplexen</i> .....	487

## F – PROBABILITY AND STATISTICS

P. Diaconis and R. L. Graham, <i>The Radon transform on <math>\mathbb{Z}_2^k</math></i> .....	323
B. R. Gelbaum, <i>Some theorems in probability theory</i> .....	383

## H – COMBINATORICS

R. Aharoni, I. B.-A. Hartman and A. J. Hoffman, <i>Path partitions and packs of acyclic digraphs</i> .....	249
J. Arkin, <i>An extension of E. G. Straus' perfect Latin 3-cube of order 7</i> .....	277
A. A. Bruen and B. L. Rothschild, <i>Lower bounds on blocking sets</i> .....	303
A. S. Fraenkel and J. Nešetřil, <i>Epidemiography</i> .....	369
L. H. Harper, <i>On a continuous analog of Sperner's problem</i> .....	411
D. H. Lehmer, <i>The chromatic polynomial of a graph</i> .....	463
H. G. Senge, <i>Reconstruction of hypertrees</i> .....	565
J. Spencer, <i>Asymptotically good coverings</i> .....	575

Our subject classifications are: A – ALGEBRA AND NUMBER THEORY; B – ANALYSIS;  
C – APPLIED MATHEMATICS; D – GEOMETRY; E – LOGIC AND FOUNDATIONS;  
F – PROBABILITY AND STATISTICS; G – TOPOLOGY; H – COMBINATORICS
