Pacific Journal of Mathematics

VOLUME CV

1983

PACIFIC JOURNAL OF MATHEMATICS

EDITORS

DONALD BABBITT (Managing Editor)
University of California
Los Angeles, CA 90024

HUGO ROSSI
University of Utah
Salt Lake City, UT 84112

C. C. MOORE and ARTHUR OGUS
University of California
Berkeley, CA 94720

J. DUGUNDJI
Department of Mathematics
University of Southern California
Los Angeles, CA 90089-1113

R. FINN and H. SAMELSON
Stanford University
Stanford, CA 94305

ASSOCIATE EDITORS

R. ARENS | E. F. BECKENBACH (1906–1982) | B. H. NEUMANN | F. WOLF | K. YOSHIDA

SUPPORTING INSTITUTIONS

UNIVERSITY OF ARIZONA
UNIVERSITY OF BRITISH COLUMBIA
CALIFORNIA INSTITUTE OF TECHNOLOGY
UNIVERSITY OF CALIFORNIA
MONTANA STATE UNIVERSITY
UNIVERSITY OF NEVADA, RENO
NEW MEXICO STATE UNIVERSITY
OREGON STATE UNIVERSITY

UNIVERSITY OF WASHINGTON

CONTENTS

A — ALGEBRA AND NUMBER THEORY

T. W. Cusick, *The two-dimensional Diophantine approximation constant.* II 53
D. Goss, *On a new type of L-function for algebraic curves over finite fields* 143
D. Hensley, *Lattice vertex polytopes with interior lattice points* . . 183
I. J. Papick, *Super-primitive elements* 217
J. C. H. Simon, *Non-linear representations of Poincaré group and global solutions of relativistic wave equations* 449
A. R. Wadsworth, *p-Henselian fields: K-theory, Galois cohomology, and graded Witt rings* 473

B — ANALYSIS

K. F. Andersen, *On the transformation of Fourier coefficients of certain classes of functions* II 1
S. R. Bell, *Regularity of the Bergman projection in certain non-pseudoconvex domains* 273
G. Brown, I. Glicksberg and E. Hewitt, *Indicator functions with large Fourier transforms* 11
C. K. Chui and M. Hasson, *Degree of uniform approximation on disjoint intervals* 291
H. O. Fattorini, *Convergence and approximation theorems for vector-valued distributions* 77
J. J. F. Fournier and L. Pigno, *Analytic and arithmetic properties of thin sets* 115
I. Glicksberg, See G. Brown, I. Glicksberg and E. Hewitt
G. G. Gundersen, *Meromorphic functions that share two finite values with their derivative* 299
M. Hasson, See C. K. Chui and M. Hasson
E. Hewitt, See G. Brown, I. Glicksberg and E. Hewitt
G. W. Johnson and D. L. Skoug, *Notes on the Feynman integral,* III: *The Schroedinger equation* 321
J. C. Kieffer, *Some topologies on the set of discrete stationary channels* 359
H. Luschgy and W. Thomsen, *Extreme points in the Hahn-Banach-Kantorovič setting* 387
L. Pigno, See J. J. F. Fournier and L. Pigno

J. L. Rubio de Francia and J. L. Torrea, *Vector extensions of operators in L^p spaces* 227
E. Saab and P. Saab, *A dual geometric characterization of Banach spaces not containing l_1* 415
P. Saab, See E. Saab and P. Saab
W. Schachermayer, *Norm attaining operators on some classical Banach spaces* 427
D. L. Skoug, See G. W. Johnson and D. L. Skoug
M. P. Thomas, *Closed ideals of $l^1(\omega_n)$ when $\{\omega_n\}$ is star-shaped* . 237
W. Thomsen, See H. Luschgy and W. Thomsen
J. L. Torrea, See J. L. Rubio de Francia and J. L. Torrea

D — GEOMETRY

G. Ceresa and A. Collino, *Some remarks on algebraic equivalence of cycles* 285
A. Collino, See G. Ceresa and A. Collino

F — PROBABILITY AND STATISTICS

S.-S. Chang, *Some random fixed point theorems for continuous random operators* 21

G — TOPOLOGY

S. A. Argyros, *On compact spaces without strictly positive measure* 257
C. R. Borges and G. Gruenhage, *Sup-characterization of stratifiable spaces* 279
K. C. Chattopadhyay and O. Njåstad, *Quasi-regular nearness spaces and extensions of nearness-preserving maps* 33
E. K. van Douwen and J. van Mill, *Spaces without remote points* . 69
G. Gruenhage, See C. R. Borges and G. Gruenhage
R. Hartley, *Lifting group homomorphisms* 311
J. K. Kohli, *Monotone extensions of mappings and their applications* 193
J. van Mill, See E. K. van Douwen and J. van Mill
J. C. Morgan II, *On equivalent category bases* 207
O. Njåstad, See K. C. Chattopadhyay and O. Njåstad
Z. Piotrowski, A. Rosłanowski and B. M. Scott, *The pinched-cube topology* 399
A. Rosłanowski, See Z. Piotrowski, A. Rosłanowski and B. M. Scott
M. Scharlemann, *Essential tori in 4-manifold boundaries* 439
B. M. Scott, See Z. Piotrowski, A. Rosłanowski and B. M. Scott

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced (not dittoed), double spaced with large margins. Please do not use built up fractions in the text of the manuscript. However, you may use them in the displayed equations. Underline Greek letters in red, German in green, and script in blue. The first paragraph must be capable of being used separately as a synopsis of the entire paper. In particular it should contain no bibliographic references. Please propose a heading for the odd numbered pages of less than 35 characters. Manuscripts, in triplicate, may be sent to any one of the editors. Please classify according to the scheme of Math. Reviews, Index to Vol. 39. Supply name and address of author to whom proofs should be sent. All other communications should be addressed to the managing editor, or Elaine Barth, University of California, Los Angeles, California 90024.

There are page-charges associated with articles appearing in the Pacific Journal of Mathematics. These charges are expected to be paid by the author's University, Government Agency or Company. If the author or authors do not have access to such Institutional support these charges are waived. Single authors will receive 50 free reprints; joint authors will receive a total of 100 free reprints. Additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is issued monthly as of January 1966. Regular subscription rate: $132.00 a year (6 Vol., 12 issues). Special rate: $66.00 a year to individual members of supporting institutions.

Subscriptions, orders for numbers issued in the last three calendar years, and changes of address should be sent to Pacific Journal of Mathematics, P.O. Box 969, Carmel Valley, CA 93924, U.S.A. Old back numbers obtainable from Kraus Periodicals Co., Route 100, Millwood, NY 10546.

The Pacific Journal of Mathematics ISSN 0030-8730 is published monthly by the Pacific Journal of Mathematics at P.O. Box 969, Carmel Valley, CA 93924. Application to mail at Second-class postage rates is pending at Carmel Valley, California, and additional mailing offices. Postmaster: Send address changes to Pacific Journal of Mathematics, P. O. Box 969, Carmel Valley, CA 93924.
