

A — ALGEBRA AND NUMBER THEORY

W. Bäni, <i>Subspaces of positive definite inner product spaces of countable dimension</i>	1
K. A. Byrd, <i>Right self-injective rings whose essential right ideals are two-sided</i>	23
P. Cousot and R. Cousot, <i>Constructive versions of Tarski's fixed point theorems</i>	43
R. Freese, W. A. Lampe and W. Taylor, <i>Congruence lattices of algebras of fixed similarity type, I</i>	59
T. C. Hurley, <i>Intersections of terms of polycentral series of free groups and free Lie algebras</i>	105
O. Kowalski, <i>On unitary automorphisms of solvable Lie algebras</i>	133
G. Myerson, <i>A combinatorial problem in finite fields, I</i>	179
J. Nelson, Jr. and M. S. Putcha, <i>Word equations in a band of paths</i>	189
D. J. Rusin, <i>What is the probability that two elements of a finite group commute?</i>	237
R. C. Thompson, <i>The case of equality in the matrix-valued triangle inequality</i>	279
M. A. Vitulli, <i>The obstruction of the formal moduli space in the negatively graded case</i>	281

B — ANALYSIS

R. A. Johnson, <i>Some relationships between measures</i>	117
B. G. Pachpatte and S. M. Singare, <i>Discrete generalized Gronwall inequalities in three independent variables</i>	197
W. L. Paschke and N. Salinas, <i>C*-algebras associated with free products of groups</i>	211
B. Reznick, <i>Banach spaces with polynomial norms</i>	223
M. Shafii-Mousavi and Z. Zielezny, <i>On hypoelliptic differential operators of constant strength</i>	249
J. G. Stampfli, <i>On self-adjoint derivation ranges</i>	257

D — GEOMETRY

M. Breen, <i>The dimension of the kernel of a Planar set</i>	15
--	----

G — TOPOLOGY

C. McA. Gordon and R. A. Litherland, <i>On a theorem of Murasugi</i>	69
M. A. Gutierrez, <i>Concordance and homotopy, I: Fundamental group</i>	75
R. Hartley, <i>Metabelian representations of knot groups</i>	93
K. Y. Lam, <i>KO-equivalences and existence of nonsingular bilinear maps</i>	145
E. P. Lane, <i>PM-normality and the insertion of a continuous function</i>	155
R. Messer, and A. Wright, <i>Embedding open 3-manifolds in compact 3-manifolds</i>	163

Our subject classifications are: A — ALGEBRA AND NUMBER THEORY; B — ANALYSIS;
 C — APPLIED MATHEMATICS; D — GEOMETRY; E — LOGIC AND FOUNDATIONS;
 F — STATISTICS; G — TOPOLOGY; H — COMBINATORICS
