## CONTENTS

T. R. Berger, <i>Hall-Higman type theorems V</i> . . . . .	1
F. P. Cass and B. E. Rhoades, <i>Mercerian theorem via spectral theory</i> . . . . .	63
L. Corwin and R. E. Howe, <i>Computing characters of tamely ramified <math>p</math>-adic division algebras</i> . . . . .	461
M. L. Eaton and M. Perlman, <i>Generating <math>O(n)</math> with reflections</i> .	73
F. Forelli, <i>A necessary condition on the extreme points of a class of holomorphic functions</i> . . . . .	81
R. E. Howe, <i>On representations of discrete, finitely generated, torsion-free, nilpotent groups</i> . . . . .	281
R. E. Howe, <i>The Fourier transform for nilpotent locally compact groups, I</i> . . . . .	307
R. E. Howe, <i>On a connection between nilpotent groups and oscillatory integrals associated to singularities</i> . . . . .	329
R. E. Howe, <i>Kirillov theory for compact <math>p</math>-adic groups</i> . . . .	365
R. E. Howe, <i>Topics in harmonic analysis on solvable algebraic groups</i> . . . . .	383
R. E. Howe, <i>Tamely ramified supercuspidal representations of <math>Gl_n</math></i> . . . . .	437
R. E. Howe, <i>Some qualitative results on the representation theory of <math>Gl_n</math> over a <math>p</math>-adic field</i> . . . . .	479
R. E. Howe, See L. Corwin and R. E. Howe	
M. F. Janowitz, <i>Complemented congruences on complemented lattices</i> . . . . .	87
M. Klawe, <i>Semidirect product of semigroups in relation to amenability, cancellation properties, and strong Følner conditions</i> . . . . .	91
T. Laetsch, <i>Normal cones, barrier cones, and the "spherical image" of convex surfaces in locally convex spaces</i> . . . .	107
C.-C. Liang, <i>Involutions fixing codimension two knots</i> . . . .	125
J. Longman, <i>On generalizations of alternative algebras</i> . . . .	131
G. Mauzeri, <i>Square integrable representations and the Fourier algebra of a unimodular group</i> . . . . .	143
J. M. Osborn, <i>Lie algebras with descending chain condition</i> . .	155
M. Perlman, See M. L. Eaton and M. Perlman	
J. R. Quine, <i>Tangent winding numbers and branched mappings</i> .	161
L. J. Ratliff, Jr. and D. E. Rush, <i>Notes on ideal covers and associated primes</i> . . . . .	169
H. B. Reiter and N. M. Stavrakas, <i>On the compactness of the hypersurface of faces</i> . . . . .	193
B. E. Rhoades, See F. P. Cass and B. E. Rhoades	
W. Roth, <i>A general Rudin-Carlson theorem in Banach-spaces</i> .	197

D. E. Rush, See L. J. Ratliff, Jr. and D. E. Rush	
M. A. Smith, <i>Products of Banach spaces that are uniformly rotund in every direction</i> . . . . .	215
R. R. Smith, <i>The R-Borel structure on Choquet simplex</i> . . . . .	221
N. M. Stavrakas, See H. B. Reiter and N. M. Stavrakas	
G. S. Stoller, <i>The convergence-preserving rearrangements of real infinite series</i> . . . . .	227
G. H. Toomer, <i>Generalized homotopy excision theorems modulo a Serre class of nilpotent groups</i> . . . . .	233
N. Weaver, <i>Dehn's construction and the Poincaré conjecture</i> . . . . .	247
S. H. Weintraub, <i>Topological realization of equivalent intersection forms</i> . . . . .	257

---

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

---

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Please do not use built up fractions in the text of the manuscript. However, you may use them in the displayed equations. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. Items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and journal, rather than by item number. Manuscripts, in triplicate, may be sent to any one of the editors. Please classify according to the scheme of Math. Reviews, Index to Vol. **39**. All other communications should be addressed to the managing editor, or Elaine Barth, University of California, Los Angeles, California, 90024.

The Pacific Journal of Mathematics expects the author's institution to pay page charges, and reserves the right to delay publication for nonpayment of charges in case of financial emergency.

50 reprints to each author are provided free for each article, only if page charges have been substantially paid. Additional copies may be obtained at cost in multiples of 50.

---

The *Pacific Journal of Mathematics* is issued monthly as of January 1966. Regular subscription rate: \$72.00 a year (6 Vols., 12 issues). Special rate: \$36.00 a year to individual members of supporting institutions.

Subscriptions, orders for numbers issued in the last three calendar years, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708. Older back numbers obtainable from Kraus Periodicals Co., Route 100, Millwood, NY 10546.
