CONTENTS

R. K. Amayo, *Engel Lie rings with chain conditions* 1
B. Anger and J. Lembcke, *Hahn-Banach type theorems for hypolinear functionals on preordered topological vector spaces* 13
G. F. Bachelis and S. E. Ebenstein, *On $\Lambda(p)$ sets* 35
H. I. Blau, *Indecomposable modules for direct products of finite groups* 39
L. E. Bobisud and J. Calvert, *Singular perturbation of a time-dependent Cauchy problem in a Hilbert space* . . . 45
W. D. Burgess and R. Raphael, *Abian's order relation and orthogonal completions for reduced rings* 55
J. Calvert, See L. E. Bobisud and J. Calvert
J. E. Coury, *Walsh series with coefficients tending monotonically to zero* 1*
J. R. Diederich, *Representation of superharmonic functions mean continuous at the boundary of the unit ball* 65
A. Dijksma and H. S. V. de Snoo, *Self-adjoint extensions of symmetric subspaces* 71
S. E. Ebenstein, See G. F. Bachelis and S. E. Ebenstein
G. A. Efroymson, *A nullstellensatz for Nash rings* 101
J. D. Elwin and D. R. Short, *Branched immersions onto compact orientable surfaces* 113
J. D. Faires, *Comparison of the states of closed linear transformations* 123
J. W. Fisher and R. L. Snider, *On the von Newmann regularity of rings with regular prime factor rings* 135
P. M. Fitzpatrick and W. V. Petryshyn, *Fixed point theorems for multivalued noncompact acyclic mappings* 17*
I. Glicksberg, *More on Phragmén-Lindelöff for function algebras* 25*
Adilson Gonçalves, *Structural Constants II* 39*
R. P. Gosselin, *Closure theorems for affine transformation groups* 53*
Ralph P. Grimaldi, *Baer and UT-modules over domains* 59*
Edward H. Grossman, *On the prime ideal divisors of $(a^n - b^n)$* . 73*
A. Hedayat and E. Seiden, *On the theory and application of sum composition of latin squares and orthogonal latin squares* . 85*
F. T. Iha, *A unified approach to boundary value problems on compact intervals* 145
Gerald L. Itzkowitz, *Continuous measures, Baire category and uniform continuity in topological groups* 115*
PI. Kannappan and C. T. Ng, *On functional equations connected*

with direct divergence, inaccuracy and generalized directed divergence 157
S. A. Khabbaz and E. H. Toubassi, *The module structure of* Ext(*F*, *T*) *over the endomorphism ring of T* 169
G. K. Kiremidjian, *On deformations of complex compact manifolds with boundary* 177
D. Koutroufiotis, *Mappings by parallel normals preserving principal directions* 191
J. Lembcke, See B. Anger and J. Lembcke
Francis F, Masat, *Right simple congruences on a semigroup* . 127*
C. T. Ng, See PI. Kannappan and C. T. Ng.
W. K. Nicholson, *Semiperfect rings with abelian adjoint group* . 201
Robert H. Oehmke, *Right congruences and semisimplicity for Rees matrix semigroups* 143*
W. V. Petryshyn, See P. M. Fitzpatrick and W. V. Petryshyn*
Q. I. Rahman and L. Stankiewicz, *Differential inequalities and local valency* 165*
R. Raphael, See W. D. Burges and R. Raphael
W. J. Reed, *Random points in a simplex* 183*
N. R. Reilly, *Extensions of congruences and homomorphism to translational hulls* 209
S. Saeki, *Symmetric maximal ideals in M(G)* 229
B. K. Schmidt, *On the homotopy invariance of certain functors* . 245
E. Seiden, See A. Hedayat and E. Seiden*
Zahava Shmuely, *The structure of Galois connections* 209*
Robert C. Shock, *Dual generalizations of the Artinian and Noetherian conditions* 227*
D. R. Short, See J. D. Elwin and D. R. Short
Mohan S. Shrikhande, *Strongly regular graphs and group divisible designs* 199*
H. J. Shyr and T. M. Viswanathan, *On the radicals of lattice-ordered rings* 257
I. Sinha, *Certain representations of infinite group algebras* . . 261
D. Smallen, *The group of self-equivalences of certain complexes* . 269
R. L. Snider, See J. W. Fisher and R. L. Snider
H. S. V. de Snoo, See Dijkama and H. S. V. de Snoo
L. Stankiewicz, See Q. I. Rahman and L. Stankiewicz*
A. Stray, *Approximation and interpolation for some spaces of analytic functions in the unit disc* 237*
E. H. Toubassi, See S. A. Khabbaz and E. H. Toubassi
K. Varadarajan, *On a certain problem of realization in homotopy theory* 277
T. M. Viswanathan, See H. J. Shyr and T. M. Viswanathan
Eldon J. Vought, *Monotone decomposition into trees of*

Hausdorff continua irreducible about a finite subset . . . 253*
J. E. West, *Sums of Hilbert cube factors* 293
James F. Wirth, *The mapping cylinder axiom for WCHP fibrations* 263*
C. S. Wong, *Fixed points and characterizations of certain maps* 305
Gordon S. Woodward, *Invariant means and ergodic sets in Fourier annalysis* 281*

* The asterisk indicates paper is in the second half of this volume. The two issues are paginated separately.

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. Items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and Journal, rather than by item number. Manuscripts, in duplicate if possible, may be sent to any one of the four editors. Please classify according to the scheme of Math. Rev. Index to Vol. **39**. All other communications to the editors should be addressed to the managing editor, or Elaine Barth, University of California, Los Angeles, California, 90024.

100 reprints are provided free for each article, only if page charges have been substantially paid. Additional copies may be obtained at cost in multiples of 50.

The *Pacific of Journal Mathematics* is issued monthly as of January 1966. Regular subscription rate: $72.00 a year (6 Vols., 12 issues). Special rate: $36.00 a year to individual members of supporting institutions.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708.
