CONTENTS

K. Abernethy, <i>On characterizing certain classes of first countable spaces by open mappings</i>	319
M. W. Bartelt, <i>Strongly unique best approximates to a function on a set, and a finite subset thereof</i>	1
R. A. Beaumont and D. A. Lawver, <i>Strongly semisimple abelian groups</i>	327
G. A. Beer, <i>The index of convexity and parallel bodies</i>	337
S. J. Bernau, <i>Theorems of Korovkin type for L_p-spaces</i>	11
S. J. Bernau and H. E. Lacey, <i>The range of a contractive pojection on an L_p-space</i>	21
M. Breen, <i>Decomposition theorem for 3-convex subsets of the plane</i>	43
R. E. Bruck, Jr., <i>A common fixed point theorem for a commuting family of nonexpansive mappings</i>	59
A. Bruen and J. C. Fisher, <i>Blocking sets and complete k-arcs</i>	73
R. C. Buck, <i>Approximation properties of vector valued functions</i>	85
V. P. Camillo and K. R. Fuller, <i>On Loewy length of rings</i>	347
S. L. Campbell, <i>Linear operators for which T^*T and TT^* commute (II)</i>	355
C. K. Chui and P. W. Smith, <i>Characterization of a function by certain infinite series it generates</i>	363
A. L. Edelson, <i>Conjugations on stably almost complex manifolds</i>	373
M. R. Embry and M. Rosenblum, <i>Spectra, tensor products, and linear operator equations</i>	95
J. C. Fisher, See A. Bruen and J. C. Fisher	
P. Fleury, <i>Hollow modules and local endomorphism rings</i>	379
E. Formanek, <i>Maximal quotient rings of group rings</i>	109
K. R. Fuller, See V. P. Camillo and K. R. Fuller	
B. J. Gardner, <i>Some aspects of T-nilpotence</i>	117
J. A. Gatica and W. A. Kirk, <i>A fixed point theorem for k-set-contractions defined in a cone</i>	131
K. R. Goodearl, <i>Localization and splitting in hereditary noetherian prime rings</i>	137
J. T. Goodykoontz, Jr., <i>Connectedness im kleinen and local connectedness in 2^X and $C(X)$</i>	387
J. V. Herod, <i>Generators for evolution systems with quasi continuous trajectories</i>	153
C. V. Hinkle, Jr., <i>The extended centralizer of an S-set</i>	163
I. M. Isaacs, <i>Lifting Brauer characters of p-solvable groups</i>	171
R. E. Jamison, <i>Functional representation of algebraic intervals</i>	399
B. R. Johnson, <i>Generalized Lerch zeta function</i>	189

A. G. Kartsatos, <i>Nonzero solutions to boundary value problems for nonlinear systems</i>	425
S.-K. Kim, D. McGavran and J. Pak, <i>Torus group actions on simply connected manifolds</i>	435
W. A. Kirk, See J. A. Gatica and W. A. Kirk	
D. A. Klarner and R. Rado, <i>Arithmetic properties of certain recursively defined sets</i>	445
E. Kleinfeld, <i>A generalization of $(-1, 1)$ rings</i>	195
R. A. Kunze, <i>On the Frobenius reciprocity theorem for square-integrable representations</i>	465
H. E. Lacey, See S. J. Bernau and H. E. Lacey	
J. Lagnese, <i>Existence uniqueness and limiting behavior of solutions of a class of differential equations in Banach space</i>	473
D. A. Lawver, See R. A. Beaumont and D. S. Lawver	
H. Leptin, <i>On symmetry of some Banach algebras</i>	203
P. W. Lewis, <i>Strongly bounded operators</i>	207
A. Lieberman, <i>Spectral distribution of the sum of self-adjoint operators</i>	211
T.-C. Lim, <i>A fixed point theorem for families of nonexpansive mappings</i>	487
L. Lum, <i>A quasi order characterization of smooth continua</i>	495
I. J. Maddox and M. A. L. Willey, <i>Continuous operators on paranormed spaces and matrix transformations</i>	217
A. R. Magid, <i>Principal homogeneous spaces and Galois extensions</i>	501
C. A. McCarthy, <i>The norm of a certain derivation</i>	515
D. McGavran, See S.-K. Kim, D. McGavran and J. Pak	
L. E. Moser, <i>On the impossibility of obtaining $S^2 \times S^1$ by elementary surgery along a knot</i>	519
G. L. Nipp, <i>Quaternion orders associated with ternary lattices</i>	525
A. G. O'Farrell, <i>Equiconvergence of derivations</i>	539
D. Olesen, <i>Derivations of AW^*-algebras are inner</i>	555
D. Olesen and G. K. Pedersen, <i>Derivations of C^*-algebras have semi-continuous generators</i>	563
D. O'Neill, <i>On conjugation cobordism</i>	573
J. Pak, See S.-K. Kim, D. McGavran and J. Pak	
S. R. Paranjape, See C. Park and S. E. Paranjape	
C. Park and S. R. Paranjape, <i>Probabilities of Wiener paths crossing differentiable curves</i>	579
G. K. Pedersen, See D. Olesen and G. K. Pedersen	
R. Rado, See D. A. Klarner and R. Rado	
J. D. Reid, <i>On rings on groups</i>	229
M. Rosenblum, See M. R. Embry and M. Rosenblum	
E. Rozema, <i>Almost Chebyshev subspaces of $L^1(\mu; E)$</i>	585

R. M. Schori and J. E. West, <i>Hyperspaces of graphs are Hilbert cubes</i>	239
L. M. Sibner and R. J. Sibner, <i>A note on the Atiyah-Bott fixed point formula</i>	605
R. J. Sibner, See L. M. Sibner and R. J. Sibner	
P. W. Smith, See C. K. Chui and P. W. Smith	
W. H. Specht, <i>A factorization theorem for p-constrained groups</i> .	253
B. S. Stark, <i>Irreducible subgroups of orthogonal groups generated by groups of root type I</i>	611
N. Stavrakas, <i>A note on starshaped sets, (k)-extreme points and the half ray property</i>	627
C. Swenson, <i>Direct sum subset decompositions of Z</i>	629
S. C. Tefteller, <i>A two-point boundary problem for nonhomogeneous second order differential equations</i>	635
R. L. Thele, <i>Iterative techniques for approximation of fixed points of certain nonlinear mappings in Banach spaces</i> .	259
T. Traynor, <i>An elementary proof of the lifting theorem</i>	267
C. Vinsonhaler and W. J. Wickless, <i>Completely decomposable groups which admit only nilpotent multiplications</i>	273
R. O. Wells, Jr., <i>Comparison of de Rham and Dolbeault cohomology for proper surjective mappings</i>	281
J. E. West, See R. M. Schori and J. E. West	
W. J. Wickless, See C. Vinsonhaler and W. J. Wickless	
M. A. L. Willey, See I. J. Maddox, and M. A. L. Willey	
R. S. Wilson, <i>Representations of finite rings</i>	643
D. Wright, <i>The non-minimality of induced central representations</i> .	301
B. Yood, <i>Commutativity properties in Banach $*$-algebras</i> . . .	307

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. Items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and Journal, rather than by item number. Manuscripts, in duplicate if possible, may be sent to any one of the four editors. Please classify according to the scheme of Math. Rev. Index to Vol. 39. All other communications to the editors should be addressed to the managing editor, or Elaine Barth, University of California, Los Angeles, California, 90024.

100 reprints are provided free for each article, only if page charges have been substantially paid. Additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is issued monthly as of January 1966. Regular subscription rate: \$72.00 a year (6 Vols., 12 issues). Special rate: \$36.00 a year to individual members of supporting institutions.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708.
