CONTENTS

A. Abian, *The use of mitotic ordinals in cardinal arithmetic* . . 1
H. E. Adams, *Filtrations and valuations on rings* 7
M. K. Agoston, *An obstruction to finding a fixed point free map on a manifold* 543
B. Artmann, *Geometric aspects of primary lattices* 15
N. A. Assad and W. A. Kirk, *Fixed point theorems for set-valued mappings of contractive type* 553
A. P. Baartz and G. G. Miller, *Souslin's conjecture as a problem on the real line* 277
J. Barback, *On solutions in the regressive isols* 283
M. Breen, *Determining a polytope by Radon partitions* 27
D. S. Browder, *Derived algebras in L_1 of a compact group* . . . 39
A. Bruen, *Unimbeddable nets of small deficiency* 51
J. Bunce, *Characterizations of amenable and strongly amenable C^*-algebras* 563
M. H. Clapp and R. F. Dickman, Jr., *Unicoherent compactifications* 55
H. S. Collins and R. A. Fontenot, *Approximate identities and the strict topology* 63
B. Dayton, *Homotopy and algebraic K-theory* 297
W. R. Derrick, *Weighted convergence in length* 307
M. V. Deshpande and N. E. Joshi, *Collectively compact and semicompact sets of linear operators in topological vector spaces* 317
R. F. Dickman, Jr., See M. H. Clapp and R. F. Dickman, Jr.
S. E. Ebenstein, *Some H^p spaces which are uncomplemented in L^p* 327
E. Ellentuck and A. B. Manaster, *The decidability of a class of AE sentence in the isols* 573
P. L. Falb and U. Haussmann, *Bochner's theorem in infinite dimensions* 601
A. Figà-Talamanca and J. F. Price, *Applications of random Fourier series over compact groups to Fourier multipliers* . 531
P. Fletcher and W. F. Lindgren, *Quasi-uniformities with a transitive base* 619
R. A. Fontenot, See H. S. Collins and R. A. Fontenot
D. H. Fremlin, *On the completion of locally solid vector lattices* . 341
D. Garbanati and R. C. Thompson, *Classes of unimodular abelian group matrices* 633
R. J. Gazik, *Convergence in spaces of subsets* 81
J. M. Geramita, *Automorphisms on cylindrical semigroups* . . . 93
K. R. Goodearl, *Distributing tensor product over direct product* . 107

H. Halpern, *Essential central spectrum and range for elements of a von Neumann algebra* 349
K. Hardy and R. G. Woods, *On c-realcompact spaces and locally bounded normal functions* 647
U. Haussmann, *The inversion theorem and Plancherel's theorem in a Banach space* 585
U. Haussmann, See P. L. Falb and U. Haussmann
J. Hennefeld, *The non-conjugacy of certain algebras of operators* . 111
C. W. Henson, *The nonstandard hulls of a uniform space* . . . 115
M. J. Huebener, *Complementation in the lattice of regular topologies* 139
D. L. Johnson, *The diophantine problem* $Y^2 - X^3 = A$ *in a polynomial ring* 151
G. D. Johnson, *Superadditivity intervals and Boas' test* 381
N. L. Johnson, *Derivation in infinite planes* 387
N. E. Joshi, See M. V. Deshpande and N. E. Joshi
A. J. Karam, *Strong Lie ideals* 157
S.-K. Kim, *On low dimensional minimal sets* 171
W. A. Kirk, See N. A. Assad and W. A. Kirk
V. M. Klassen, *The disappearing closed set property* 403
M. Knebusch, A. Rosenberg and R. Ware, *Grothendieck and Witt rings of hermitian forms over Dedekind rings* 657
T. L. Kriete, III and M. Rosenblum, *A Phragmén-Lindelöf theorem with applications to* $\mathscr{M}(u, v)$ *functions* 175
B. Kuttner and B. N. Sahney, *On the absolute matrix summability of Fourier series* 407
W. A. Lampe, *Notes on related structures of a universal algebra* . 189
G. M. Lewis, *Cut loci of points at infinity* 675
W. F. Lindgren, See P. Fletcher and W. F. Lindgren
J. I. Malitz and W. N. Reinhardt, *A complete countable* $L^{Q}_{\omega_1}$ *theory with maximal models of many cardinalities* 691
A. B. Manaster, See E. Ellentuck and A. B. Manaster
G. Maxwell, *Algebras of normal matrices* 421
K. McKennon, *Multipliers of type* (p, p) 429
G. G. Miller, See A. P. Baartz and G. G. Miller
J. Miller, *Sequences of quasi-subordinate functions* 437
L. Miller, *The Hasse-Witt-matrix of special projective varieties* . 443
M. C. Mooney, *A theorem on bounded analytic functions* 457
T. W. Palmer, *The reducing ideal is a radical* 207
W. D. Pepe and W. P. Ziemer, *Slices, multiplicity, and Lebesgue area* 701
M. A. Piech, *Differential equations on abstract Wiener space* . . 465
K. R. Pierce, *Amalgamating abelian ordered groups* 711
R. Piziak, *Sesquilinear forms in infinite dimensions* 475

J. F. Price, See A. Figà-Talamanca and J. F. Price
S. J. Pride, *Residual properties of free groups* 725
R. M. Rakestraw, *The convex cone of n-monotone functions* . . . 735
K. M. Rangaswamy and N. Vanaja, *Quasi projectives in abelian and module categories* 221
W. N. Reinhardt, See J. I. Malitz and W. N. Reinhardt
M. L. Robertson, *The equation* $y'(t) = F(t, y(g(t)))$ 483
L. E. Rogers, *Continua in which only semi-aposyndetic subcontinua separate* 493
A. Rosenberg, See M. Knebusch, A. Rosenberg and R. Ware
M. Rosenblum, See T. L. Kriete, III and M. Rosenblum
L. P. Rothschild, *Bi-invariant pseudo-local operators on Lie groups* 503
B. N. Sahney, See B. Kuttner and B. N. Sahney
T. Schwartzbauer, *Entropy and approximation of measure preserving transformations* 753
G. M. Shah, *On the univalence of some analytic functions* . . . 239
R. E. Smithson and L. E. Ward, Jr., *The fixed point property for Arcwise connected spaces: A correction* 511
L. R. Sons, *Zeros of sums of series with Hadamard gaps* 515
P. F. Stebe, *Invariant functions of an iterative process for maximization of a polynomial* 765
A. Stray, *Interpolation sets for uniform algebras* 525
K. Sundaresan and W. A. Woyczynski, *L-orthogonally scattered measures* 785
R. C. Thompson, See D. Garbanati and R. C. Thompson
J. E. Valentine and S. G. Wayment, *Criteria for Banach spaces* . 251
N. Vanaja, See K. M. Rangaswamy and N. Vanaja
J. E. Vaughan, *Linearly stratifiable spaces* 253
K. D. Wallace, C_λ*-groups and* λ*-basic subgroups* 799
L. E. Ward, Jr., See R. E. Smithson and L. E. Ward, Jr.
R. Ware, See M. Knebusch, A. Rosenberg and R. Ware
S. G. Wayment, See J. E. Valentine and S. G. Wayment
B. M. Weinstock, *Approximation by holomorphic functions on certain product sets in* C^N 811
R. G. Woods, See K. Hardy and R. G. Woods
W. A. Woyczynski, See K. Sundaresan and W. A. Woyczynski
Z. Zielezny, *On spaces of distributions strongly regular with respect to partial differential operators* 267
W. P. Ziemer, See W. D. Pepe and W. P. Ziemer

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. The editorial "we" must not be used in the synopsis, and items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and Journal, rather than by item number. Manuscripts, in duplicate if possible, may be sent to any one of the four editors. Please classify according to the scheme of Math. Rev. Index to Vol. **39**. All other communications to the editors should be addressed to the managing editor, Richard Arens, University of California, Los Angeles, California, 90024.

50 reprints are provided free for each article; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published monthly. Effective with Volume 16 the price per volume (3 numbers) is $8.00; single issues, $3.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: $4.00 per volume; single issues $1.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708.
