CONTENTS

T. B. Andersen, *On Banach space valued extensions from split faces* 1
D. M. Arnold, *A duality for quotient divisible abelian groups of finite rank* 11
D. P. Ballou, *Shock sets for first order nonlinear hyperbolic equations* 17
C. Bandle, *Extensions of an inequality by Pólya and Schiffer for vibrating membranes* 543
S. J. Bernau, *Topologies on structure spaces of lattice groups* . . 557
S. R. Bernfeld, *The extendability of solutions of perturbed scalar differential equations* 277
W. W. Bledsoe and C. E. Wilks, *On borel product measures* . . . 569
E. Briem and M. Rao, *Normpreserving extensions in subspaces of $C(X)$* 581
J. Brink, *Inequalities involving $\|f\|_p$ and $\|f^{(n)}\|_q$ for f with n zeros* 289
L. Brown and L. Hansen, *On the range sets of H^p functions* . . 27
A. S. Cover, *Generalized continuation* 589
L. Cummings, *Transformations of symmetric tensors* 603
P. M. Curran, *Cohomology of finitely presented groups* 615
A. M. Davie and A. Stray, *Interpolation sets for analytic functions* 33
J. B. Derr and N. P. Mukherjee, *Generalized quasicenter and hyperquasicenter of a finite group* 621
M. G. Deshpande, *Structure of right subdirectly irreducible rings II* 39
E. Ellentuck, *Universal cosimple isols* 629
B. Evans, *Boundary respecting maps of 3-manifolds* 639
D. F. Fraser, *A probabilistic method for the rate of convergence to the Dirichlet problem* 657
O. Frink and R. S. Smith, *On the distributivity of the lattice of filters of a groupoid* 313
B. J. Gardner, *Some closure properties for torsion classes of abelian groups* 45
D. L. Goldsmith, *On the density of certain cohesive basic sequences* . 323
C. L. Hagopian, *Planar images of decomposable continua* 329
L. Hansen, See L. Brown and L. Hansen
P. Hill, *Primary groups whose subgroups of smaller cardinality are direct sums of cyclic groups* 63
R. Holzsager, *When certain natural maps are equivalences* . . . 69
R. T. Hoobler, *Cohomology in the finite topology and Brauer groups* 667

W. N. Hudson, *A decomposition theorem for biadditive processes* . 333
W. N. Hudson, *Continuity of sample functions of biadditive processes* 343
L. R. Hunt, *Locally holomorphic sets and the Levi form* 681
M. Izumi and S. Izumi, *Integrability of trigonometric series II* . 359
S. Izumi, See M. Izumi and S. Izumi
D. W. Kahn, *A note on H-equivalences* 77
J.-H. Kim, *R-automorphisms of* $R[t][[X]]$ 81
S. Kinoshita, *On elementary ideals of polyhedra in the* 3*-sphere* . 89
A. T. Kitchen, *Watts cohomology and separability* 99
H.-M. Ko, *Fixed point theorems for point-to-set mapping and the set of fixed points* 369
V. Komkov, *A technique for the detection of oscillation of second order ordinary differential equations* 105
G. Krabbe, *An algebra of generalized functions on an open interval: Two-sided operational calculus* 381
T. L. Kriete, *III Complete non-selfadjointness of almost self-adjoint operators* 413
B. Kwee, *On absolute de la Vallée Poussin summability* 689
S. N. Lal and S. Ram, *On the absolute Hausdorff summability of a Fourier series* 439
G. Lallement, *On nilpotency and residual finiteness in semi-groups* 693
G. E. Lang, Jr., *Evaluation subgroups of factor spaces* 701
C. Lanski and S. Montgomery, *Lie structure of prime rings of characteristic* 2 117
A. Lenard, *Some remarks on large Toeplitz determinants* 137
K. B. Levitz, *A characterization of general Z.P.I.-rings II* . . . 147
R. Lipsman, *Representation theory of almost connected groups* . 453
D. A. Lutz, *On the reduction of rank of linear differential systems* . 153
A. R. Magid, *A separably closed ring with nonzero torsion pic* . 711
J. R. McLaughlin, *Integrated orthonormal series* 469
D. G. Mead, *Determinantal ideals, identities and the Wronskian* . 165
H. Minc, *On permanents of circulants* 477
S. Montgomery, See C. Lanski and S. Montgomery
N. P. Mukherjee, See J. B. Derr and N. P. Mukherjee
A. Mukherjea, *A remark on Tonelli's theorem on integration in product spaces* 177
H. C. Myung, *A generalization of the prime radical in non-associative rings* 187
A. Okuyama, *On a generalization of* Σ*-spaces* 485
J. Piepenbrink, *Rellich densities and an application to unconditionally nonoscillatory elliptic equations* 195
M. J. Powers, *Lefschetz fixed point theorems for a new class of*

multi-valued maps 211
A. S. Rao, *On the absolute matrix summability of a Fourier series* 221
S. Ram, See S. N. Lal and S. Ram
M. Rao, See E. Briem and M. Rao
T. S. Ravisankar, *On Malcev algebras* 227
B. E. Rhoades, *Commutants of some Haudorff matrices* 715
M. Rosenlicht, *Canonical forms for local derivations* 721
W. H. Ruckle, *Topologies on sequences* 235
N. Salinas, *Invariant subspaces and operators of class* (S) . . . 497
C. F. Schubert, *On a conjecture of L. B. Page* 733
R. Schultz, *Composition constructions on diffeomorphisms of* $S^p \times S^q$ 739
R. C. Shock, *Polynomial rings over finite dimensional rings* . . 251
J. P. Singhal and H. M. Srivastava, *A class of bilateral generating functions for certain classical polynomials* 755
R. Slocum, *Using brick partitionings to establish conditions which insure that a Peano continuum is a 2-cell, a 2-sphere or an annulus* 763
J. F. Smith, *The p-classes of an* H^**-slgebra* 777
R. S. Smith, See O. Frink and R. S. Smith
H. M. Srivastava, See J. P. Singhal and H. M. Srivastava
J. D. Stafney, *The spectrum of certain lower triangular matrices as operators on the* l_p *spaces* 515
A. Stray, See A. M. Davie and A. Stray
A. Stray, *Interpolation by analytic functions* 527
L. P. Su, *Rings on analytic functions on any subset of the complex plane* 535
R. L. Tangeman, *Strong heredity in radical classes* 259
R. J. Tondra, *A property of manifolds compactly equivalent to compact manifolds* 539
B. R. Wenner, *Finite-dimensional properties of infinitedimensional spaces* 267
C. E. Wilks, See W. W. Bledsoe and C. E. Wilks
J. Williamson, *Meromorphic functions with negative zeros and positive poles and a theorem of Teichmüller* 795
W. R. Zame, *Algebras of analytic functions in the plane* 811

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. The editorial "we" must not be used in the synopsis, and items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and Journal, rather than by item number. Manuscripts, in duplicate if possible, may be sent to any one of the four editors. Please classify according to the scheme of Math. Rev. Index to Vol. **39**. All other communications to the editors should be addressed to the managing editor, Richard Arens, University of California, Los Angeles, California, 90024.

50 reprints are provided free for each article; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published monthly. Effective with Volume 16 the price per volume (3 numbers) is $8.00; single issues, $3.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: $4.00 per volume; single issues $1.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708.
