R. D. Anderson and T. A. Chapman, <i>Extending homeomorphisms to Hilbert cube Manifolds</i>	281
N.-H.-Anh, <i>Restriction of the principal series of $SL(n, C)$ to some reductive subgroups</i>	295
D. W. Boyd, <i>Indices for the Orlicz spaces</i>	315
W. G. Bridges, <i>The polynomial of non-regular digraph</i>	325
B. C. Carlson, R. K. Meany and S. A. Nelson, <i>Mixed arithmetic and geometric means</i>	343
H. A. Celik, <i>Commutative associative rings and anti-flexible rings</i>	351
H. Chu, <i>On the structure of almost periodic transformation groups</i>	359
D. A. Drake, <i>The translation groups of n-uniform translation Hjelmslev planes</i>	365
M. Freeman, <i>The polynomial hull of a thin two-manifold</i>	377
A. A. Gioia and D. L. Goldsmith, <i>Convolutions of arithmetic functions over cohesive basic sequences</i>	391
L. C. Glaser, <i>A proof of the most general polyhedral Schoenflies conjecture possible</i>	401
T. L. Hayden and T. J. Suffridge, <i>Biholomorphic maps in Hilbert space have a fixed point</i>	419
R. A. Horn, <i>Schlicht mappings and infinitely divisible kernels</i>	423
N. R. Howes, <i>On completeness</i>	431
H. Imai, <i>Sario potentials on Riemannian spaces</i>	441
A. A. Iskander, <i>Subalgebra systems of powers of partial universal algebras</i>	457
B. E. Johnson, <i>Norms of derivations of $\mathcal{L}(X)$</i>	465
D. C. Kay and E. W. Womble, <i>Axiomatic convexity theory and relationships between the Caratheodory, Helly, and Radon numbers</i>	471
C. G. Lascarides, <i>A study of certain sequence spaces of Maddox and a generalization of a theorem of Iyer</i>	487
C. N. Linden, <i>On Blaschke products of restricted growth</i>	501
J. S. Lowndes, <i>Some triple integral equations</i>	515
S. D. McCartan, <i>Bicontinuous preordered topological spaces</i>	523
S. Moedomo and J. J. Uhl, Jr., <i>Radon-Nikodym theorems for Bochner and Pettis integrals</i>	531
C. C. Moore and J. A. Wolf, <i>Totally real representations and real function spaces</i>	537
R. T. Prosser, <i>A form of the moment problem for Lie groups</i>	543
L. Smith, <i>A note on annihilator ideals of complex bordism classes</i>	551
J. Warren, <i>Meromorphic annular functions</i>	559

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. The editorial "we" must not be used in the synopsis, and items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and Journal, rather than by item number. Manuscripts, in duplicate if possible, may be sent to any one of the four editors. Please classify according to the scheme of Math. Rev. Index to Vol. 39. All other communications to the editors should be addressed to the managing editor, Richard Arens, University of California, Los Angeles, California, 90024.

50 reprints are provided free for each article; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published monthly. Effective with Volume 16 the price per volume (3 numbers) is \$8.00; single issues, \$3.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: \$4.00 per volume; single issues \$1.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708.
