CONTENTS

R. D. Anderson and T. A. Chapman, *Extending homeomorphisms to Hilbert cube Manifolds* 281
N.-H.-Anh, *Restriction of the principal series of SL(n, C) to some reductive subgroups* 295
B. A. Barnes, *Banach algebras which are ideals in Banach algebra* . 1
J. T. Borrego, H. Cohen and E. E. DeVun, *Uniquely representable semigroups on the two-cell* 565
D. W. Boyd, *Inequalities for positive integral operators* 9
D. W. Boyd, *Indices for the Orlicz spaces* 315
G. E. Bredon, *Some examples for the fixed point property* 571
W. G. Bridges, *The polynomial of non-regular digraph* 325
L. G. Brown, *Note on the open mapping theorem* 25
W. L. Bynum, *Characterizations of uniform convexity* 577
B. C. Carlson, R. K. Meany and S. A. Nelson, *Mixed arithmetic and geometric means* 343
H. A. Çelik, *Commutative associative rings and anti-flexible rings* . 351
T. A. Chapman, See R. D. Anderson and T. A. Chapman
H. Chu, *On the structure of almost periodic transformation groups* . 359
H. Cohen, See J. T. Borrego, H. Cohen and E. E. DeVun
S. D. Comer, *Representations by algebras of sections over Boolean spaces* 29
D. Derry, *The convex hulls of the vertices of a polygon of order n* . 583
E. E. DeVun, See J. T. Borrego, H. Cohen and E. E. DeVun
D. A. Drake, *The translation groups of n-uniform translation Hjelmslev planes* 365
E. Duda and J. W. Smith, *Reflexive open mappings* 597
J. R. Edwards and S. G. Wayment, *On the nonequivalence of conservative Hausdorff methods and Hausdorff moment sequences* 39
P. D. T. A. Elliott, *On the limiting distribution of additive functions (MODI)* 49
M. R. Embry, *Classifying special operators by means of subsets associated with the numerical range* 61
Y. K. Feng and M. V. Subbarao, *On the density of (k, r)-integers* . 613
M. Freeman, *The polynomial hull of a thin two-manifold* 377
A. A. Gioia and D. L. Goldsmith, *Convolutions of arithmetic functions over cohesive basic sequences* 391
L. C. Glaser, *A proof of the most general polyhedral Schoenflies conjecture possible* 401
L. Glicksberg and I. Wik, *Multipliers of quotients of* L_1 619
D. L. Goldsmith, See A. A. Gioia and D. L. Goldsmith
J. W. Green, *Separating certain plane-like spaces Peano continua* . 625

L. A. Harris, *A continuous form of Schwarz's lemma in normed linear spaces* 635
D. J. Hartfiel, *Counterexamples to a conjecture of G. N. de Oliveira* 67
T. L. Hayden and T. J. Suffridge, *Biholomorphic maps in Hilbert space have a fixed point* 419
C. W. Henson, *A family of countable homogeneous graphs* 69
R. E. Hodel, *Moore spaces and wΔ-spaces* 641
R. A. Horn, *Schlicht mappings and infinitely divisible kernels* . . 423
N. R. Howes, *On completeness* 431
L. S. Husch, *Homotopy groups of PL-embedding spaces, II* . . . 653
S. Igari and S. Kuratsubo, *A sufficient condition for L-multipliers* . 85
H. Imai, *Sario potentials on Riemannian spaces* 441
A. A. Iskander, *Subalgebra systems of powers of partial universal algebras* 457
Y. Isomichi, *New concepts in the theory of topological space-supercondensed set, subcondensed set, and condensed set* . . 657
B. E. Johnson, *Norms of derivations of* $\mathscr{L}(\mathfrak{X})$ 465
D. C. Kay and E. W. Womble, *Axiomatic convexity theory and relationship between the Caratheodory, Helly, and Radon numbers* 471
J. E. Kerlin, Jr., *On algebra actions on a group algebra* 669
K. Kikuchi, *Canonical domains and their geometry in* C^n 681
W. A. Kirk, *Fixed point theorems for nonlinear nonexpansive and generalized contraction mappings* 89
E. Kleinfeld, *A generalization of commutative and associative rings* 95
S. Kuratsubo, See S. Igari and S. Kuratsubo
D. B. Lahirii, *Some restricted partition functions congruences modulo II* 103
C. G. Lascarides, *A study of certain sequence spaces of Maddox and a generalization of a theorem Iyer* 487
T. Y. Lin, *Homological algebra of stable homotopy ring* π_* *of spheres* 117
C. N. Linden, *On Blaschke products of restricted growth* 501
J. S. Lowndes, *Some triple integral equations* 515
M. Marden, *A representation for the logartithmic derivate of a meromorphic function* 145
S. D. McCartan, *Bicontinuous preordered topological spaces* . . . 523
R. D. McWilliams, *On iterated w*-sequential closure of cones* . . 697
R. K. Meany, See B. C. Carlson, R. K. Meany and S. A. Nelson
C. R. Miers, *Lie homomorphisms of operator algebras* 717
S. Moedomo and J. J. Uhl, Jr., *Radon-Nikodym theorems for Bochner and Pettis integrals* 531

C. C. Moore and J. A. Wolf, *Totally real representations and real function spaces* 537
L. Moser, *Elementary surgery along a torus knot* 737
S. A. Nelson, See B. C. Carlson, R. K. Meany and S. A. Nelson
J. C. Nichols and J. C. Smith, *Examples concerning sum properties for metric-dependent dimension functions* . . . 151
H. Onose, *Oscillatory properties of solutions of even order differential equations* 747
W. H. Ow, *Wiener's compactification and Φ-bounded harmonic functions in the classification of harmonic spaces* 759
R. T. Prosser, *A form of the moment problem for Lie groups* . . 543
A. B. Raha, *On completely Hausdorff-completion of completely Hausdorff space* 161
M. Rajagopalan and B. Schreiber, *Ergodic automorphisms and affine transformations of locally compact groups* 167
N. V. Rao and A. K. Roy, *Linear isometries of some functions spaces* 177
W. F. Reynolds, *Blocks and F-class algebras of finite groups* . . 193
R. Rochberg, *Which linear maps of the disk algebra are multiplicative*? 207
A. K. Roy, See N. V. Rao and A. K. Roy
Z. Rubinstein, *On the multivalence of a class of meromorphic functions* 771
G. Sampson, *Sharp estimates of convolution transforms in terms of decreasing functions* 213
S. Scheinberg, *Fatou's lemma in normed linear spaces* 233
B. Schreiber, See M. Rajagopalan and B. Schreiber
J. K. Shaw, *Whittaker constants for entire functions of several complex variables* 239
J. C. Smith, See J. C. Nichols and J. C. Smith
J. W. Smith, See E. Duda and J. W. Smith
L. Smith, *A note on annihilator ideals of complex bordism classes* . 551
T. D. Stein, Jr., *Two uniform boundedness theorems* 251
H. H. Storrer, *Rational extensions of modules* 785
A. R. Stralka, *The congruence extension property for compact topological lattices* 795
R. E. Strong, *On the cobordism of pairs* 803
L. P. Su, *Homomorphism of near-rings of continuous functions* . 261
M. V. Subbarao, See Y. K. Feng and M. V. Subbarao
T. J. Suffridge, See T. L. Hayden and T. J. Suffridge
J. J. Uhl, Jr., See S. Moedomo and J. J. Uhl, Jr.
J. Warren, *Meromorphic annular functions* 559
S. G. Wayment, See J. R. Edwards and S. G. Wayment
A. L. Whiteman, *An infinite family of skew Hadamard matrices* . 817

I. Wik, See L. Glicksberg and I. Wik
S. W. Willard, *Functionally compact spaces, C-compact spaces and mappings of minimal Hausdorff spaces* 267
J. P. Williams, *On the range of a derivation* 273
L. R. Williams, *Generalized Hausdorff-Young inequalities and mixed norm spaces* 823
J. A. Wolf, See C. C. Moore and J. A. Wolf
E. W. Womble, See D. C. Kay and E. W. Womble

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. The editorial "we" must not be used in the synopsis, and items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and Journal, rather than by item number. Manuscripts, in duplicate if possible, may be sent to any one of the four editors. Please classify according to the scheme of Math. Rev. Index to Vol. **39**. All other communications to the editors should be addressed to the managing editor, Richard Arens, University of California, Los Angeles, California, 90024.

50 reprints are provided free for each article; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published monthly. Effective with Volume 16 the price per volume (3 numbers) is $8.00; single issues, $3.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: $4.00 per volume; single issues $1.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708.

PUBLISHED BY PACIFIC JOURNAL OF MATHEMATICS, A NON-PROFIT CORPORATION
