CONTENTS

J. F. Aarnes, E. G. Effros and O. A. Nielsen, <i>Locally compact spaces and two classes of C^*-algebras</i>	1
S. Ahmad, <i>On the oscillation of solutions of a class of linear fourth order differential equations</i>	289
L. Asimow and A. J. Ellis, <i>Facial decomposition of linearly compact simplexes and separation of functions on cones</i> . . .	301
K. A. Baker and A. R. Stralka, <i>Compact, distributive lattices of finite breadth</i>	311
Richard Bouldin, <i>The perturbation of the singular spectrum</i> . . .	569
H. D. Brunk and S. Johansen, <i>A generalized Radon-Nikodym derivative</i>	585
J. W. Cannon, <i>Sets which can be missed by side approximations to spheres</i>	321
P. Chandra, <i>Absolute summability by Riesz means</i>	335
F. T. Christoph, Jr., <i>Free topological semigroups and embedding topological semigroups in topological groups</i>	343
A. C. Cochran, R. Keown and C. R. Williams, <i>On a class of topological algebras</i>	17
H. B. Cohen and F. E. Sullivan, <i>Projecting onto cycles in smooth, reflexive Banach spaces</i>	355
John Dauns, <i>Integral domains that are not embeddable in division rings</i>	27
John Dauns, <i>Power series semigroup rings</i>	365
R. J. Daverman, <i>On the number of nonpiercing points in certain crumpled cubes</i>	33
H. W. Davis, F. J. Murray and J. K. Weber, Jr., <i>Families of L_p-spaces with inductive and projective topologies</i>	619
Esmond DeVun, <i>Special semigroups on the two-cell</i>	639
R. E. Dressler, <i>A density which counts multiplicity</i>	371
E. G. Effros, See J. F. Aarnes, E. G. Effros and O. A. Nielsen	
M. Eisenberg and J. H. Hedlund, <i>Expansive automorphisms of Banach spaces</i>	647
B. L. Elkins, <i>Characterization of separable ideals</i>	45
A. J. Ellis, See L. Asimow and A. J. Ellis	
Z. Fiedorowicz, <i>A comparison of two naturally arising uniformities on a class of pseudo-PM spaces</i>	51
H. C. Finlayson, <i>Approximation of Wiener integrals of functionals continuous in the uniform topology</i>	61
K. R. Fuller, <i>Primary rings and double centralizers</i>	379
T. W. Gamelin, <i>Localization of the Corona problem</i>	73
G. A. Gislason, <i>On the existence question for a family of products</i> .	385
A. Gleit, <i>On the structure topology of simplex spaces</i>	389

W. R. Gordon and M. Marcus, <i>An analysis of equality in certain matrix inequalities, I</i>	407
A. Gray and P. Green, <i>Sphere transitive structures and the triality automorphisms</i>	83
P. Green, See A. Gray and P. Green	
F. F. Gulick, <i>Actions of functions in Banach algebras</i>	657
C. L. Hagopian, <i>On generalized forms of Aposyndesis</i>	97
Douglas Harris, <i>Regular-closed spaces and proximities</i>	675
J. H. Hedlund, See M. Eisenberg and J. H. Hedlund	
J. Jakubik, <i>On subgroups of a pseudo lattice ordered group</i> . . .	109
S. Johansen, See H. D. Brunk and S. Johansen	
G. W. Johnson and D. L. Skoug, <i>Operator-valued Feynman integrals of finite-dimensional functionals</i>	415
N. L. Johnson, <i>Derivable semi-translation planes</i>	687
H. D. Kahn, <i>Covering semigroups</i>	427
Keith Kendig, <i>Fibrations of analytic varieties</i>	441
R. Keown, See A. C. Cochran, R. Keown and C. R. Williams	
D. E. Knuth, <i>Permutations, matrices, and generalized young tableaux</i>	709
H. F. Kreimer, <i>On the Galois theory of separable algebras</i> . . .	729
Y. -F. Lin and D. A. Rose, <i>Ascoli's theorem for spaces of multi-functions</i>	741
David London, <i>Rearrangement inequalities involving convex functions</i>	749
N. Y. Luther, <i>Weak denseness of nonatomic measures on perfect, locally compact spaces</i>	453
M. Marcus, See W. R. Gordon and M. Marcus	
F. J. Murray, See H. W. Davis, F. J. Murray and J. K. Weber, Jr.	
O. A. Nielsen, See J. F. Aarnes, E. G. Effros and O. A. Nielsen	
C. W. Onneweer, <i>On uniform convergence for Walsh-Fourier series</i>	117
S. J. Osher, <i>On certain Toeplitz operators in two variables</i> . . .	123
G. Owen, <i>The four-person constant-sum games: discriminatory solutions on the main diagonal</i>	461
S. K. Parrott, <i>Unitary dilations for commuting contractions</i> . . .	481
W. F. Pfeffer and W. J. Wilbur, <i>On the measurability of Perron integrable functions</i>	131
Louis Pigno, <i>A multiplier theorem</i>	755
F. J. Polansky, <i>On the conformal mapping of variable regions</i> .	145
R. M. Rakestraw, <i>Extremal elements of the convex cone A_n of functions</i>	491
P. L. Renz, <i>Intersection representations of graphs by arcs</i> . . .	501
D. A. Rose, See Y. -F. Lin and D. A. Rose	
W. H. Ruckle, <i>Representation and series summability of complete</i>	

<i>biorthogonal sequences</i>	511
Helga Schirmer, <i>Coincidences and fixed points of multifunctions into trees</i>	759
Richard Scoville, <i>Some measure algebras on the integers</i>	769
Kouei Sekigawa and Shûkichi Tanno, <i>Sufficient conditions for a Riemannian manifold to be locally symmetric</i>	157
F. D. Sentilles, <i>The strict topology on bounded sets</i>	529
S. Shelah, <i>A note on Hanf numbers</i>	541
R. E. Showalter, <i>Local regularity of solutions of Sobolev-Galpern partial differential equations</i>	781
A. J. Sieradski, <i>Twisted self-homotopy equivalences</i>	789
H. Simmons, <i>The solution of a decision problem for several classes of rings</i>	547
D. L. Skoug, See G. W. Johnson and D. L. Skoug	
J. H. Smith, <i>On S-units almost generated by S-units of subfields</i> .	803
J. W. Stepp, <i>Locally compact Clifford semigroups</i>	163
E. L. Stitzinger, <i>Frattini subalgebras of a class of solvable Lie algebras</i>	177
A. R. Stralka, See K. A. Baker and A. R. Stralka	
F. E. Sullivan, See H. B. Cohen and F. E. Sullivan	
George Szeto, <i>The group character and split group algebras</i> . . .	183
Masamichi Takesaki, <i>Algebraic equivalence of locally normal representations</i>	807
Shûkichi Tanno, See Kouei Sekigawa and Shûkichi Tanno	
M. L. Teply, <i>Homological dimension and splitting torsion theories</i> .	193
J. E. Valentine, <i>An analogue of Ptolemy's theorem and its converse in hyperbolic geometry</i>	817
D. B. Wales, <i>Finite linear groups of degree seven II</i>	207
R. B. Warfield Jr., <i>An isomorphic refinement theorem for Abelian groups</i>	237
J. K. Weber, Jr., See H. W. Davis, F. J. Murray and J. K. Weber, Jr.	
J. E. West, <i>The ambient homeomorphy of an incomplete subspace of infinite-dimensional Hilbert spaces</i>	257
W. J. Wilbur, See W. F. Pfeffer and W. J. Wilbur	
Peter Wilker, <i>Adjoint product and hom functors in general topology</i>	269
C. R. Williams, See A. C. Cochran, R. Keown and C. R. Williams	
K. S. Williams, <i>Finite transformation formulae involving the Legendre symbol</i>	559
D. L. Winter, <i>Solvability of certain p-solvable linear groups of finite order</i>	827
D. E. Wulbert, <i>A note on the characterization of conditional expectation operators</i>	285

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, (not dittoed), double spaced with large margins. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. The editorial "we" must not be used in the synopsis, and items of the bibliography should not be cited there unless absolutely necessary, in which case they must be identified by author and Journal, rather than by item number. Manuscripts, in duplicate if possible, may be sent to any one of the four editors. Please classify according to the scheme of Math. Rev. **36**, 1539-1546. All other communications to the editors should be addressed to the managing editor, Richard Arens, University of California, Los Angeles, California, 90024.

50 reprints are provided free for each article; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published monthly. Effective with Volume 16 the price per volume (3 numbers) is \$8.00; single issues, \$3.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: \$4.00 per volume; single issues \$1.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708.

PUBLISHED BY PACIFIC JOURNAL OF MATHEMATICS, A NON-PROFIT CORPORATION

Printed at Kokusai Bunken Insatsusha (International Academic Printing Co., Ltd.), 7-17, Fujimi 2-chome, Chiyoda-ku, Tokyo, Japan.
