

Pacific Journal of Mathematics

George E. Andrews, <i>On a calculus of partition functions</i>	555
Silvio Aurora, <i>A representation theorem for certain connected rings</i>	563
Larry Baggett, <i>A note on groups with finite dual spaces</i>	569
Steven Bank, <i>On majorants for solutions of algebraic differential equations in regions of the complex plane</i>	573
Klaus Bichteler, <i>Locally compact topologies on a group and the correspond- ing continuous irreducible representations</i>	583
Mario Borelli, <i>Affine complements of divisors</i>	595
Carlos R. Borges, <i>A study of absolute extensor spaces</i>	609
Bruce L. Chalmers, <i>Subspace kernels and minimum problems in Hilbert spaces with kernel function</i>	619
John Dauns, <i>Representation of L-groups and F-rings</i>	629
S. E. Dickson and K. R. Fuller, <i>Algebras for which every indecomposable right module is invariant in its injective envelope</i>	655
R. B. Fraser, Jr., and S. B. Nadler, Jr., <i>Sequences of contractive maps and fixed points</i>	659
Judith Gersting, <i>A rate of growth criterion for universality of regressive isols</i>	669
Robert Gordon, <i>Rings in which minimal left ideals are projective</i>	679
Fred Gross, <i>Entire functions of several variables with algebraic derivatives at certain algebraic points</i>	693
W. Charles Holland and Stephen H. McCleary, <i>Wreath products of ordered permutation groups</i>	703
W. J. Kim, <i>The Schwarzian derivative and multivalence</i>	717
R. H. LaGrange, <i>On $(m - n)$ products of Boolean algebras</i>	725
Charles D. Masiello, <i>The average of a gauge</i>	733
Stephen H. McCleary, <i>The closed prime subgroups of certain ordered permutation groups</i>	745
Richard Roy Miller, <i>Gleason parts and Choquet boundary points in convolu- tion measure algebras</i>	755
H. LeRoy Peterson, <i>On dyadic subspaces</i>	773
Derek J. S. Robinson, <i>Groups which are minimal with respect to normality being intransitive</i>	777
R. E. Showalter, <i>Partial differential equations of Sobolev-Galpern type</i>	787
David Slepian, <i>The content of some extreme simplexes</i>	795
Joseph L. Taylor, <i>Noncommutative convolution measure algebras</i>	809
B. S. Yadav, <i>Contractions of functions and their Fourier series</i>	827

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, double spaced with large margins. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. It should not contain references to the bibliography. Manuscripts, in duplicate if possible, may be sent to any one of the four editors. Please classify according to the scheme of Math. Rev. **36**, 1539-1546. All other communications to the editors should be addressed to the managing editor, Richard Arens, University of California, Los Angeles, California, 90024.

50 reprints are provided free for each article; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published monthly. Effective with Volume 16 the price per volume (3 numbers) is \$8.00; single issues, \$3.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: \$4.00 per volume; single issues \$1.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley, California, 94708.
