CONTENTS

Martin Aigner, <i>On the tetrahedral graph</i>	219
P. M. Anselone and T. W. Palmer, <i>Collectively compact sets of linear operators</i>	417
P. M. Anselone and T. W. Palmer, <i>Spectral analysis of collectively compact, strongly convergent operator sequences</i> . .	423
Gregory F. Bachelis, <i>Homomorphisms of annihilator Banach algebra</i>	229
Edward A. Bender, <i>Characteristic polynomials of symmetric matrices</i>	433
Glen E. Bredon, <i>Cosheaves and homology</i>	1
R. M. Brooks, <i>The structure space of a commutative locally M-convex algebra</i>	443
Robin W. Chaney, <i>A chain rule for the transformation of integrals in measure space</i>	33
Colin Clark, <i>On relatively bounded perturbations of ordinary differential operators</i>	59
J. E. Diem, <i>A radical for lattice-ordered rings</i>	71
Zeev Ditzian, <i>On a class of convolution transforms</i>	83
J. Feldman and F. P. Greenleaf, <i>Existence of Borel transversals in groups</i>	455
T. M. Flett, <i>Mean values of power series</i>	463
R. V. Fuller, <i>Relations among continuous and various non-continuous functions</i>	495
Dennis E. Garoutte and Paul A. Nickel, <i>A note on extremal properties characterizing weakly λ-valent principal functions</i>	109
F. P. Greenleaf, See J. Feldman and F. P. Greenleaf	
Phillip Griffith, <i>Transitive and fully transitive primary abelian groups</i>	249
Benjamin Halpern, <i>Fixed points for iterates</i>	255
Philip Hartman, <i>Convex sets and the bounded slope condition</i> . .	511
Marcel Herzog, <i>On finite groups containing a CCT-subgroup with a cyclic Sylow subgroup</i>	523
James S. Howland, <i>On the essential spectrum of Schroedinger operators with singular potentials</i>	533
Thomas W. Hungerford, <i>On the structure of principal ideal rings</i> .	543
James Keesling, <i>Mappings and dimension in general metric spaces</i>	277
Al Kelley, <i>Invariance for linear systems of ordinary differential equations</i>	289
Paul Kelly and E. G. Straus, <i>Curvature in Hilbert geometries. II</i> .	549

Hayri Körezlioğlu, <i>Reproducing kernels in separable Hilbert spaces</i> . 305	
G. Levin and W. V. Vasconcelos, <i>Homological dimensions and Macaulay rings</i>	315
Shwu-Yeng T. Lin, <i>Fixed point properties and inverse limit spaces</i> . 117	
John S. Lowndes, <i>Some dual series equations involving Laguerre polynomials</i>	123
Mitsuru Nakai and Leo Sario, <i>Point norms in the construction of harmonic forms</i>	325
Paul A. Nickel, See Dennis E. Garoutte and Paul A. Nickel	
Kirti K. Oberai, <i>Sum and product of commuting spectral operators</i> . 129	
B. L. Osofsky, <i>Noncommutative rings whose cyclic modules have cyclic injective hulls</i>	331
T. W. Palmer, See P. M. Anselone and T. W. Palmer	
T. W. Palmer, See P. M. Anselone and T. W. Palmer	
J. N. Pandey and A. H. Zemanian, <i>Complex inversion for the generalized convolution transformation</i>	147
S. K. Parrott, <i>Isometric multipliers</i>	159
N. T. Peck, <i>Extreme points and dimension theory</i>	341
Manoranjan Prasad, <i>Note on an extreme form</i>	167
M. M. Rao, <i>Linear functionals on Orlocz spaces: general theory</i> . 553	
S. F. Robinson, <i>Theorems on Brewer sums</i>	587
R. Tyrrell Rockafellar, <i>A general correspondence between dual minimax problems and convex programs</i>	597
Leo Sario, See Mitsuru Nakai and Leo Sario	
Michael Schilder, <i>Expected values of functionals with respect to the Ito distribution</i>	371
Jack Segal, <i>Quasi dimension type. II. Types in I-dimensional spaces</i>	353
R. B. Sher, <i>Defining subsets of E^3 by cubes</i>	613
M. Skwarczynski, <i>A representation of a bounded function as infinite product in a domain with Bergman-Shilov boundary surface</i>	177
E. G. Straus, See Paul Kelly and E. G. Straus	
J. C. Taylor, <i>The Silov boundary for a lattice-ordered semigroup</i> . 185	
D. R. Traylor and J. N. Younglove, <i>On normality and pointwise paracompactness</i>	193
Grigorios Tsagas, <i>A Riemannian space with strictly positive sectional curvature</i>	381
L. Tzafriri, <i>Quasi-similarity for spectral operators on Banach spaces</i>	197
W. V. Vasconcelos, See G. Levin and W. V. Vasconcelos	
Howard Weiner, <i>Invariant measures and Cesàro summability</i> . . 621	

J. A. Williamson, <i>Random walks and Riesz kernels</i>	393
J. N. Younglove, See D. R. Traylor and J. N. Younglove	
A. H. Zemanian, See J. N. Pandey and A. H. Zemanian

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be in typed form or offset-reproduced, double spaced with large margins. Underline Greek letters in red, German in green, and script in blue. The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. It should not contain references to the bibliography. Manuscripts, in duplicate if possible, may be sent to any one of the four editors. All other communications to the editors should be addressed to the managing editor, Richard Arens, University of California, Los Angeles, California 90024.

Each author of each article receives 50 reprints free of charge; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published monthly. Effective with Volume 16 the price per volume (3 numbers) is \$8.00; single issues, \$3.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: \$4.00 per volume; single issues \$1.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley 8, California.

Printed at Kokusai Bunken Insatsusha (International Academic Printing Co., Ltd.), 7-17, Fujimi 2-chome, Chiyoda-ku, Tokyo, Japan.

PUBLISHED BY PACIFIC JOURNAL OF MATHEMATICS, A NON-PROFIT CORPORATION

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners of publishers and have no responsibility for its content or policies.
