CONTENTS

J. S. Alin and S. E. Dickson, <i>Goldie's torsion theory and its derived functor</i>	195
H. P. Allen, <i>Lie algebras of type D_4 over algebraic number fields</i>	1
Steve Armentrout, Lloyd L. Lininger and Donald V. Meyer, <i>Equiv- alent decompositions of R^3</i>	205
Duane W. Bailey, <i>On symmetry in certain group algebras</i>	413
C. S. Ballantine, <i>Products of positive definite matrices. II</i>	7
L. P. Belluce and S. K. Jain, <i>Prime rings with a one-sided ideal satisfying a polynomial identity</i>	421
David W. Boyd, <i>The spectral radius of averaging operators</i>	19
William H. Caldwell, <i>Hypercyclic rings</i>	29
L. Carlitz, <i>A note on certain biorthogonal polynomials</i>	425
F. W. Carroll, <i>Some properties of sequences, with an application to noncontinuable power series</i>	45
J. H. Carruth, <i>A note on partially ordered compacta</i>	229
C. O. Christenson and R. P. Osborne, <i>Pointlike subsets of a manifold</i>	431
Charles E. Clark and Carl Eberhart, <i>A Characterization of compact connected planar lattices</i>	233
Allan Clark and Larry Smith, <i>The rational homotopy of a wedge</i>	241
D. B. Coleman, <i>Semigroup algebras that are group algebras</i>	247
David F. Dawson, <i>Matrix summability over certain classes of sequences ordered with respect to rate of convergence</i>	51
S. E. Dickson, See J. S. Alin and S. E. Dickson	
D. W. Dubois, <i>Second note on David Harrison's theory of pre- primes</i>	57
Carl Eberhart, See Charles E. Clark and Carl Eberhart	
Russell J. Egbert, <i>Products and quotients of probabilistic metric spaces</i>	437
Edgar Enochs, <i>A note on quasi-Frobenius rings</i>	69
Ronald J. Ensey, <i>Isomorphism invariants for Abelian groups modulo bounded groups</i>	71
Ronald Fulp, <i>Generalized semigroup kernels</i>	93
John E. Gilbert, <i>Convolution operators on $L^p(G)$ and properties of locally compact groups</i>	257
Moses Glasner, Richard Katz and Mitsuru Nakai, <i>Bisection into small annuli</i>	457
Fletcher Gross, <i>Groups admitting a fixed-point-free automorphism of order 2^n</i>	269
Karl Gustafson, <i>A note on left multiplication of semigroup generators</i>	463

Jack Hardy and H. Elton Lacey, <i>Extensions of regular Borel measures</i>	277
Richard Holmes, See Bernard Kripke and Richard Holmes	
R. G. Huffstutler and F. Max Stein, <i>The approximate solution of $y' = F(x, y)$</i>	283
I. M. Issacs and D. S. Passman, <i>A characterization of groups in terms of the degrees of their characters II.</i>	467
S. K. Jain, See L. P. Belluce and S. K. Jain	
M. J. Kascic, Jr., <i>Polynomials in linear relations</i>	291
Richard Katz, See Moses Glasner, Richard Katz, and Mitsuru Nakai	
Alan G. Konheim and Benjamin Weiss, <i>A note on functions which operate</i>	297
Bernard Kripke and Richard Holmes, <i>Interposition and approximation</i>	103
H. W. Lambert and R. B. Sher, <i>Point-like O-Dimensional decompositions of S^3</i>	511
H. Elton Lacey, See Jack Hardy and H. Elton Lacey	
Lloyd L. Lininger, See Steve Armentrout, Lloyd L. Lininger and Donald V. Meyer	
W. S. Loud, <i>Self-adjoint multi-point boundary value problems</i> .	303
Jack W. Macki and James S. W. Wong, <i>Oscillation of solutions to second-order nonlinear differential equations.</i>	111
Kenneth D. Magill, Jr., <i>Topological spaces determined by left ideals of semigroups</i>	319
Morris Marden, <i>On the derivative of canonical products</i>	331
Donald V. Meyer, See Steve Armentrout, Lloyd L. Lininger and Donald V. Meyer	
Lothrop Mittenthal, <i>Operator valued analytic functions and generalizations of spectral theory</i>	119
T. S. Motzkin and J. L. Walsh, <i>A persistent local maximum of the pth power deviation on an interval, $p < 1$</i>	133
Mitsuru Nakai, See Moses Glasner, Richard Katz, and Mitsuru Nakai	
J. L. Nelson, <i>A stability theorem for a third order nonlinear differential equation.</i>	341
Oscar Tivis Nelson, Jr., <i>Subdirect decompositions of lattices of width two.</i>	519
R. P. Osborne, See C. O. Christenson and R. P. Osborne	
D. S. Passman, See I. M. Issacs and D. S. Passman	
Jerome L. Paul, <i>Sequences of homeomorphisms which converge to homeomorphisms</i>	143
R. Redheffer, <i>Functions with real poles and zeros</i>	345
R. T. Rockafellar, <i>Integrals which are convex functionals</i> . . .	525
Maxwell Rosenlicht, <i>Liouville's theorem on functions with elementary integrals</i>	153

Joseph G. Rosenstein, <i>Initial segments of degrees</i>	163
R. B. Sher, See H. W. Lambert and R. B. Sher	
James M. Sloss, <i>Reflection laws of systems of second order elliptic differential equations in two independent variables with constant coefficients</i>	541
Donald Z. Spicer, <i>Group algebras of vector-valued functions</i> . . .	379
F. Max Stein, See R. G. Huffstutler and F. Max Stein	
H. Subramanian, <i>Ideal neighbourhoods in a ring</i>	173
Dalton Tarwater, <i>Galois cohomology of Abelian groups</i>	177
Myles Tierney, <i>Some applications of a property of the functor Ef</i>	401
Bui An Ton, <i>Nonlinear elliptic convolution equations of Wiener-Hopf type in a bounded region</i>	577
J. P. Williams, <i>Schwarz norms for operators</i>	181
Raymond Y. T. Wong, <i>A wild Cantor set in the Hilbert cube</i> .	189
J. L. Walsh, See T. S. Motzkin and J. L. Walsh	
Benjamin Weiss, See Alan G. Konheim and Benjamin Weiss	
James S. W. Wong, See Jack Macki and James S. W. Wong	
Daniel E. Wulbert, <i>Some complemented function spaces in $C(X)$</i> .	589
Zvi Ziegler, <i>On the characterization of measures of the cone dual to a generalized convexity cone</i>	603

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be typewritten (double spaced). The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. It should not contain references to the bibliography. Manuscripts may be sent to any one of the four editors. All other communications to the editors should be addressed to the managing editor, Richard Arens at the University of California, Los Angeles, California 90024.

50 reprints per author of each article are furnished free of charge; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published monthly. Effective with Volume 16 the price per volume (3 numbers) is \$8.00; single issues, \$3.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: \$4.00 per volume; single issues \$1.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley 8, California.

Printed at Kokusai Bunken Insatsusha (International Academic Printing Co., Ltd.), 7-17, Fujimi 2-chome, Chiyoda-ku, Tokyo, Japan.

PUBLISHED BY PACIFIC JOURNAL OF MATHEMATICS, A NON-PROFIT CORPORATION

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.
