CONTENTS

L. D. Baumert, *Extreme copositive quadratic forms* 197
F. J. Bellar, Jr., *Pointwise bounds for the second initial-boundary value problem of parabolic type* 205
S. J. Bernau, *The spectral theorem for unbounded normal operators* 391
A. R. Brodsky, *The existence of wave operators for nonlinear equations* 1
L. Carlitz and D. P. Roselle, *Restricted bipartite partitions*. . . 221
G. D. Chakerian, *Sets of constant width* 13
Robin W. Chaney, *On the transformation of integrals in measure space* 229
Lu-San Chen, *Asymptotic behavior of solutions of parabolic equations of higher order* 407
Colin Clark, *An embedding theorem for function spaces* 243
R. R. Colby, *On indecomposable modules over rings with minimum condition* 23
Lawrence Conlon, *An application of the Bott suspension map to the topology of EIV* 411
J. R. Dorroh, *Contraction semi-groups in a function space* . . . 35
Edwin Duda, *A theorem on one-to-one mappings* 253
Victor A. Dulock and Harold V. McIntosh, *On the degeneracy of the Kepler problem* 39
James A. Dyer, *The inversion of a class of linear operators* . . 57
Ben Fitzpatrick, Jr. and D. R. Traylor, *Two theorems on metrizability of Moore spaces* 259
N. E. Foland and J. M. Marr, *Sets with zero-dimensional kernels* 429
S. P. Franklin and R. H. Sorgenfrey, *Closed and image-closed relations* 433
Allen R. Freedman, *An inequality for the density of the sum of sets of vectors in n-dimentional space* 265
Michael Friedberg, *On representations of certain semi-groups* . . 269
Robert W. Gilmer, Jr., *The pseudo-radical of a commutative ring* 275
Myron Goldstein, *K-and L-kernels on an arbitrary Riemann surface* 449
N. S. Gopalakrishnan and R. Sridharan, *Homological dimension of Ore-extensions*. 67
Daniel Gorenstein, *On a theorem of Philip Hall* 77
William J. Gray, *A note on topological transformation groups*

with a fixed end point 441
Stanley P. Gudder, *Uniqueness and existence properties of bounded observables* 81
George J. Kertz and Francis Regan, *The exponential analogue of a generalized Weierstrass series* 461
Hikosaburo Komatsu, *Fractional powers of operators* 285
Walter Leighton, *On Liapunov functions with a single critical point* 467
Bernard W. Levinger and Richard S. Varga, *On a problem of O. Taussky* 473
L. D. Loveland, *Tame subsets of spheres in* E^3 489
J. M. Marr, *See N. E. Foland and J. M. Marr* 429
Harold V. McIntosh, *See Victor A. Dulock and Harold V. McIntosh* 39
R. J. Miech, *An asymptotic property of the Euler function* . . . 95
Francis Regan, *See George J. Kertz and Francis Regan* 461
P. A. Rejto, *On the essential spectrum of the hydrogen energy and related operators* 109
Daniel Rider, *Transformations of Fourier coefficients* 347
D. P. Roselle, *See Carlitz and D. P. Roselle* 221
David A. Sánchez, *Some existence theorems in the calculus of variations* 357
D. Sather, *Maximum and monotonicity properties of initial-boundary value problems for hyperbolic equations* 141
Erik A. Schreiner, *Modular pairs in orthomodular lattices* . . . 519
R. H. Sorgenfrey, *See S. P. Franklin and R. H. Sorgenfrey* . . 433
R. Sridharan, *See N. S. Gopalakrishnan and R. Sridharan* . . . 67
K. N. Srivastava, *On dual series relations involving Laguerre polynomials* 529
Arthur Steger, *Diagonability of idempotent matrices* 535
Peggy Tang Strait, *Sample function regularity for Gaussian processes with the parameter in a Hilbert space* 159
Walter A. Strauss, *On continuity of functions with values in various Banach spaces* 543
D. Reginald Traylor, *Metrizability in normal Moore spaces* . . . 175
D. Reginald Traylor, *See Ben Fitzpatrick, Jr. and D. R. Traylor* . 259
V. R. Rao Uppuluri, *On a stronger version of Wallis' formula* . 183
Richard S. Varga, *See Bernard W. Levinger and Richard S. Varge* 473
Robert Vermes, *On the zero of a linear combination of polynomials* . 553
E. C. Weinberg, *On the scarcity of lattice-ordered matrix rings* . 561
Harold Widom, *Toeplitz operators on* H_p 573
Howard J. Wilcox, *Pseudo compact groups* 365

Adil Yaqub, *Some classes of ring-logics* 189
William P. Ziemer, *Some lower bounds for Lebesgue area* 381
Neal Zierler, *On the lattice of closed subspaces of Hilbert space* . 583

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be typewritten (double spaced). The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. It should not contain references to the bibliography. Manuscripts may be sent to any one of the four editors. All other communications to the editors should be addressed to the managing editor, Richard Arens at the University of California, Los Angeles, California 90024.

50 reprints per author of each article are furnished free of charge; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published monthly. Effective with Volume 16 the price per volume (3 numbers) is $8.00; single issues, $3.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: $4.00 per volume; single issues $1.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley 8, California.

Printed at Kokusai Bunken Insatsusha (International Academic Printing Co., Ltd.), No. 6, 2-chome, Fujimi-cho, Chiyoda-ku, Tokyo, Japan.

PUBLISHED BY PACIFIC JOURNAL OF MATHEMATICS, A NON-PROFIT CORPORATION

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.
