CONTENTS

A. Arhangel'skill, <i>On closed mappings, bicomact spaces, and a problem of P. Aleksandrov</i>	201
A. K. Austin, <i>A note on loops</i>	209
William G. Bade and Philip C. Curtis, Jr., <i>Embedding theorems for commutative Banach algebras</i>	391
E. J. Barbeau, <i>Semi-algebras that are lower semi-lattices</i>	1
S. F. Bauman, <i>The Klein group as an automorphism group without fixed points</i>	9
Wilfred E. Barnes, <i>On the Γ-rings of Nobusawa</i>	411
Homer Bechtell, <i>Frattini subgroups and Φ-central groups</i>	15
L. P. Belluce and W. A. Kirk, <i>Fixed-point theorems for families of contraction mappings</i>	213
E. K. Blum, <i>A convergent gradient procedure in prehilbert spaces</i>	25
E. M. Bolger, <i>The sum of two independent exponential-type random variables</i>	31
D. W. Bressler and A. P. Morse, <i>Images of measurable sets</i>	37
J. D. Brooks, <i>Second order dissipative operators</i>	423
D. R. Brown and J. G. LaTorre, <i>A characterization of uniquely divisible commutative semigroups</i>	57
S. R. Caradus, <i>Operators of Riesz type</i>	61
S. R. Caradus, <i>Operators with finite ascent and descent</i>	437
Luther Claborn, <i>Every Abelian group is a class group</i>	219
Luther Claborn, <i>A note on the class group</i>	223
E. A. Coddington and A. Zettl, <i>Hermitian and anti-Hermitian properties of Green's matrices</i>	451
Philip C. Curtis, Jr., See William G. Bade and Philip C. Curtis, Jr.	
Jeffrey Davis and I. I. Hirschman, Jr., <i>Toeplitz forms and ultraspherical polynomials</i>	73
R. S. DeZur, <i>Point-determining homomorphisms on multiplicative semi-groups of continuous functions</i>	227
Robert A. DiPaola, <i>On sets represented by the same formula in distinct consistent axiomatizable Rosser theories</i>	455
Mary R. Embry, <i>Conditions implying normality in Hilbert space</i>	457
Lorraine L. Foster, <i>On the characteristic roots of the product of certain rational integral matrices of order two</i>	97
Raymond W. Freese, <i>A convexity property</i>	237
G. I. Gaudry, <i>Quasimeasures and operators commuting with convolution</i>	461
G. I. Gaudry, <i>Multipliers of type (p, q)</i>	477

Alfred Gray and S. M. Shah, <i>Asymptotic values of a holomorphic function with respect to its maximum term</i>	111
F. P. Greenleaf, <i>Characterization of group algebras in terms of their translation operators</i>	243
Ernest L. Griffin, <i>Everywhere defined linear transformations affiliated with rings of operators</i>	489
S. L. Gulick, <i>Commutativity and ideals in the biduals of topological algebras</i>	121
Philip Hartman, <i>On the bounded slope condition</i>	495
David W. Henderson, <i>Relative general position</i>	513
I. I. Hirschman, Jr., See Jeffrey Davis and I. I. Hirschman, Jr.	
A. Hulanicki, <i>On the spectral radius of Hermitian elements in group algebras</i>	277
William B. Jones, <i>Duality and types of completeness in locally convex spaces</i>	525
G. K. Kalisch, <i>Characterizations of direct sums and commuting sets of Volterra operators</i>	545
W. A. Kirk, See L. P. Belluce and W. A. Kirk	
G. J. Kurowski, <i>Further results in the theory of monodiffrie functions</i>	139
J. G. LaTorre, See D. R. Brown and J. G. LaTorre	
Lawrence S. Levy, <i>Commutative rings whose homomorphic images are self-injective</i>	149
Calvin T. Long, <i>On real numbers having normality of order k</i> .	155
Ottmar Loos, <i>Über eine beziehung zwischen Malcev-Algebren und Lie-Tripelsystemen</i>	553
M. Maschler and B. Peleg, <i>A characterization, existence proof and dimension bounds for the kernel of a game</i>	289
Bertram Mond, <i>An inequality for operators in a Hilbert space</i> .	161
A. P. Morse, See D. W. Brown and A. P. Morse	
Yiannis N. Moschovakis, <i>Many-one degrees of the predicates $H_a(x)$</i>	329
J. W. Neuberger, <i>The lack of self-adjointness in three point boundary value problems</i>	165
G. O. Okikiolu, <i>nth order integral operators associated with Hilbert transforms</i>	343
B. Peleg, See M. Maschler and B. Peleg	
C. A. Persinger, <i>Subsets of n-books in E^3</i>	169
C. E. Rickart, <i>Analytic phenomena in general function algebras</i> .	361
Oscar Rothaus and John G. Thompson, <i>A combinatorial problem in the symmetric group</i>	175
Rodolfo De Šapio, <i>Unknotting spheres via Smale</i>	179
S. M. Shah See Alfred Gray and S. M. Shah	
James E. Shockley, <i>On the functional equation $F(mn)F((m, n)) = F(m)F(n)f(m, n)$</i>	185

K. N. Srivastava, <i>On an entire function of an entire function defined by Dirichlet series</i>	379
John G. Thompson, See Oscar Rothaus and John G. Thompson	
Paul Waltman, <i>Oscillation criteria for third order nonlinear differential equations</i>	385
R. J. Warne, <i>A class of bisimple inverse semigroups</i>	563
Kenneth, E. Whipple, <i>Cauchy sequences in Moore spaces</i>	191

NAVAL ORDNANCE TEST STATION

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be typewritten (double spaced). The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. It should not contain references to the bibliography. Manuscripts may be sent to any one of the four editors. All other communications to the editors should be addressed to the managing editor, Richard Arens at the University of California, Los Angeles, California 90024.

50 reprints per author of each article are furnished free of charge; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published monthly. Effective with Volume 16 the price per volume (3 numbers) is \$8.00; single issues, \$3.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: \$4.00 per volume; single issues \$1.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley 8, California.

Printed at Kokusai Bunken Insatsusha (International Academic Printing Co., Ltd.), No. 6, 2-chome, Fujimi-cho, Chiyoda-ku, Tokyo, Japan.

PUBLISHED BY PACIFIC JOURNAL OF MATHEMATICS, A NON-PROFIT CORPORATION

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.

* Paul A. White, Acting Editor until J. Dugundji returns.
