# CONTENTS

M. I. Aissen, *A set function defined for convex plane domains* . . 383
S. A. Amitsur, *Commutative linear differential operators* . . . . 1
Richard Arens, *The maximal ideals of certain function algebras* . . 641
Mashiko Atsuji, *Uniform continuity of continuous functions of a metric spaces* . . . . . 11
S. P. Avann, *A numerical condition for modularity of lattice* . . . 17
Raymond G. Ayoub, *A mean value theorem for quadratic fields* . . 23
John H. Barrett, *Second order complex differential equations with a real independent variable* . . . . . 187
Glen Baxter, *An operator identity* . . . . . 649
Errett Bishop, *Subalgebras of functions on a Riemann surface* . . 29
Robert J. Blattner, *Automorphic group representations* . . . . . 665
Steven Bryant, *Isomorphism order for Abelian groups* . . . . . 679
Ward Cheney, See Allen A. Goldstein and Ward Cheney.
Charles W. Curtis, *Modules whose annihilators are direct summands* . 685
W. E. Deskins, *On the radical of a group algebra* . . . . . 693
Robert Ellis, *Distal transformation groups* . . . . . 401
Jacob Feldman, *Equivalence and perpendicularity of Gaussian processes* . . . . . 699
S. R. Foguel, *The relations between a spectral operator and its scalar part* . . . . . 51
Ciprian Foias, *On a commutative extension of a commutative Banach algebra* . . . . . 407
M. K. Fort Jr., and G. A. Hedlund, *Minimal coverings of pairs by triples* . . . . . 709
Avner Friedman, *Remarks on the maximum principle for parabolic equations and its applications* . . . . . 201
Jerry W. Gaddum, *Linear inequalities and quadratic forms* . . . 411
I. S. Gál, *On the theory of $(m, n)$-compact topological spaces* . . . 721
David Gale and Oliver Gross, *A note on polynomial and separable games* . . . . . 735
Richard R. Goldberg, *An inversion of the Stieltjes transform* . . . 213
Allen A. Goldstein and Ward Cheney, *A finite algorithm for the solution of consistent linear equations and inequalities and for the Tchebycheff approximation of inconsistent linear equations* . . . . . 415
Oliver Gross, See David Gale and Oliver Gross.
Frank Harary, *On the number of BI-colored graphs* . . . . . 743
Bruno Harris, *Centralizers in Jordan algebras* . . . . . 757

William L. Hart and Theodore S. Motzkin, *Proof of the fundamental theorem on implicit functions by use of composite gradient corrections* . . . . . 429
G. A. Hedlund, See M. K. Fort Jr., and G. A. Hedlund.
Olavi Hellman, *On the periodicity of the solution of a certain nonlinear integral equation* . . . . . 219
Gilbert Helmberg, *A theorem on equidistribution in compact groups* . 227
Henry Helson, *Conjugate series and a theorem of Paley* . . . . 437
Wu-chung Hsiang, *Abelian groups characterized by their independent subsets* . . . . . 447
J. R. Isbell, *Euclidean and weak uniformities* . . . . . 67
Lloyd K. Jackson, *Subfunctions and the Dirichlet problem* . . . . 243
Martin Jurchescu, *Modules of a boundary component* . . . . . 791
A. Jakimovski, See G. Szekeres and A. Jakimovski.
Samuel Karlin and James McGregor, *Many server queueing processes with Poisson input and exponential service times* . . 87
Paul Kelly and Ernst Straus, *Curvature in Hilbert geometries* . . 119
H. Kenyon and A. P. Morse, *Runs* . . . . . 811
Naoki Kimura, *The structure of idempotent semigroups* (I) . . . 257
Stephen Kulik, *A method of approximating the complex roots of equations* . . . . . 277
John Lamperti, *Stationary measures for certain stochastic processes* . 127
John Lamperti, *On the isometries of certain function spaces* . . . 459
Karel de Leeuw and Walter Rudin, *Extreme points and extremum problems in* $H_1$ . . . . . 467
Eugene Lukacs, *Some extensions of a theorem of Marcinkiewicz* . . 487
James McGregor, See Samuel Karlin and James McGregor.
George W. Mackey, *Multiplicity free representations of finite groups* . . . . . 503
Eben Matlis, *Injective modules over Noetherian rings* . . . . . 511
Burnett Meyer and H D Sprinkle, *Two non-separable complete metric spaces defined on* [0, 1] . . . . . 825
A. C. Mewborn, *A note on a paper of L. Güttman.* . . . . . 283
A. P. Morse, See H. Kenyon and A. P. Morse
Theodore S. Motzkin, See William L. Hart and Theodore Motzkin.
Zeev Nehari, *On the principal frequency of a membrane* . . . . 285
J. W. Neuberger, *Continuous products and nonlinear integral equations* . . . . . 529
L. E. Payne and H. F. Weinberger, *New bounds for solutions of second order elliptic partial differential equations* . . . . . 551
R. S. Pierce *Distributivity and the normal completion of Boolean algebras* . . . . . 133
G. Pólya and I. J. Schoenberg, *Remarks on de la Vallée Poussin*

*means and convex conformal maps of the circle* . . . . . 295
F. M. Ragab, *Transcendental addition theorems for the hypergeometric function of Gauss* . . . . . 141
William T. Reid, *Principal solutions of non-oscillatory self adjoint linear differential systems* . . . . . 147
William T. Reid, *A Prüfer transformation for differential systems* . 575
Howard L. Rolf, *The free lattice generated by a set of chains* . . 585
M. S. Robertson, *Cesáro partial sums of harmonic series expansions* . 829
Walter Rudin, See Karel de Leeuw and Walter Rudin.
K. M. Saksena, *Inversion and representation theorems for a generalized Laplace integral* . . . . . 597
I. J. Schoenberg, See G. Pólya and I. J. Schoenberg.
J. L. Selfridge and Ernst Straus, *On the determination of numbers by their sums of a fixed order* . . . . . 847
Daniel Shanks, *Two theorems of Gauss* . . . . . 609
Annette Sinclair, *A general solution for a class of approximation problems* . . . . . 857
Maurice Sion, *On general minimax theorems* . . . . . 171
Paul Slepian, *On the Lebesgue area of a doubled map* . . . . . 613
H D Sprinkle, See Burnett Meyer and H D Sprinkle.
Ernst Straus, See Paul Kelly and Ernst Straus and J. L. Selfridge and Ernst Straus.
B. M. Stewart, *Asymmetry of a plane convex set with respect to its centroid* . . . . . 335
G. Szekeres and A. Jakimovski, $(C, \infty)$ *and* $(H, \infty)$ *methods of summation* . . . . . 867
Otto Szász and Nelson Yeardley, *The representation of an analytic function by general Laguerre series* . . . . . 621
H. F. Trotter, *Approximation of semi-groups of operators* . . . . 887
L. E. Ward Jr., *A fixed point theorem for multi-valued functions* . 921
H. F. Weinberger, *Lower bounds for higher eigenvalues by finite difference methods* . . . . . 339
H. F. Weinberger, See L. E. Payne and H. F. Weinberger.
Chien Wenjen, *On semi-normed *-algebras* . . . . . 177
Edwin Weiss and Neal Zierler, *Locally compact division rings* . . 369
R. E. Wild, *On the number of lattice points in* $x^t + y^t = n^t/2$ . . . 929
A. C. Wood, *On two-dimensional convex bodies* . . . . . 635
Nelson Yeardley, See Otto Szász and Nelson Yeardley.
Bertram Yood, *Homomorphisms on normed algebras* . . . . . 373
Neal Zierler, See Edwin Weiss and Neal Zierler.

**CONTENTS**

S. A. Amitsur, *Commutative linear differential operators*.....1
Masahiko Atsuji, *Uniform continuity of continuous functions of metric spaces*.....11
S. P. Avann, *A numerical condition for modularity of a lattice*.....17
Raymond G. Ayoub, *A mean value theorem for quadratic fields*.....23
Errett Bishop, *Subalgebras of functions on a Riemann surface*.....29
S. R. Foguel, *The relations between a spectral operator and its scalar part*.....51
J. R. Isbell, *Euclidean and weak uniformities*.....67
Samuel Karlin and James McGregor, *Many server queueing processes with poisson input and exponential service times*.....87
Paul Kelly and Ernst Straus, *Curvature in Hilbert geometries*.....119
John Lamperti, *Stationary measures for certain stochastic processes*.....127
R. S. Pierce, *Distributivity and the normal completion of Boolean algebras*.....133
F. M. Ragab, *Transcendental addition theorems for the hypergeometric function of Gauss*.....141
William T. Reid, *Principal solutions of non-oscillatory self adjoint linear differential systems*.....147
Maurice Sion, *On general minimax theorems*.....171
Chien Wenjen, *On semi-normed *-algebras*.....177

---

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be typewritten (double spaced), and the author should keep a complete copy. Manuscripts may be sent to any of the editors. All other communications to the editors should be addressed to the managing editor, E. G. Straus at the University of California, Los Angeles 24, California.

50 reprints per author of each article are furnished free of charge; additional copies may be obtained at cost in multiples of 50.

---

The *Pacific Journal of Mathematics* is published quarterly, in March, June, September, and December. The price per volume (4 numbers) is $12.00; single issues, $3.50. Back numbers are available. Special price to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: $4.00 per volume; single issues, $1.25.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 2120 Oxford Street, Berkeley 4, California.

Printed at Kokusai Bunken Insatsusha (International Academic Printing Co., Ltd.), No. 10, 1-chome, Fujimi-cho, Chiyoda-ku, Tokyo, Japan.

PUBLISHED BY PACIFIC JOURNAL OF MATHEMATICS, A NON-PROFIT CORPORATION

The Supporting Institutions listed above contribute to the cost of publication of this Journal, but they are not owners or publishers and have no responsibility for its content or policies.
