CONTENTS

Richard F. Arens and James Eells, Jr., *On embedding uniform and topological spaces.* 397
N. Aronszajn and P. Panitchpakdi, *Extension of uniformly continuous transformations and hyperconvex metric spaces.* . . . 405
Louis Auslander, *Remark on the use of forms in variational calculations* 209
I. A. Barnett, see C. W. Mendel and I. A. Barnett . . . . . .
David Blackwell, *An analog of the minimax theorem for vector payoffs* 1
H. S. Butts and H. B. Mann, *Corresponding residue systems in algebraic number fields* 211
L. Carlitz and John H. Hodges, *Distribution of matrices in a finite field.* 225
K. L. Chung and C. Derman, *Non-recurrent random walks* . . . 441
Paul Civin and Bertram Yood, *Invariant functionals* 231
Paul Civin, *Correction to "Some ergodic theorems involving two operators".* 795
L. W. Cohen, *A non-archimedian measure in the space of real sequences* 9
H. H. Corson, *On some special systems of equations* 449
Charles W. Curtis, *On Lie algebras of algebraic linear transformations* 453
George B. Dantzig, *Constructive proof of the min-max theorem* . . 25
C. Derman, see K. L. Chung and C. Derman
D. J. Dickinson, H. O. Pollak and G. H. Wannier, *On a class of polynomials orthogonal over a denumerable set* 239
Jim Douglas, Jr., *On the numerical integration of quasi-linear parabolic differential equations* 35
James Eells, Jr., see Richard F. Arens and James Eells, Jr.
Leon Ehrenpreis, *Some properties of distributions on Lie groups* . . 591
J. M. G. Fell, *A note on abstract measure* 43
G. C. Ford, see L. I. Mishoe and G. C. Ford.
M. K. Fort, Jr., *A geometric problem of Sherman Stein.* 607
Bernard Friedman and L. I. Mishoe *Eigenfunction expansions associated with a non-self-adjoint differential equation* 249
P. R. Garabedian, *Calculation of axially symmetric cavities and jets.* 611
Walter M. Gilbert, *completely monotonic functions on cones* 685
Seymour Ginsberg, *On mappings from the family of well ordered subsets of a set.* 583
John W. Green, *Mean values of harmonic functions on homothetic curves.* 279

Charles J. A. Halberg, Jr. and Angus E. Taylor, *On the spectra of linked operators* 283
Frank Harary, *On the number of dissimilar line-subgraphs of a given graph* 57
W. L. Hart and T. S. Motzkin, *A composition Newton-Raphson gradient method for the solution of systems of equations* . . . 691
N. S. Hawley, *Complex bundles with abelian group* 65
I. Heller, *Neighbor relations on the convex of cyclic permutations.* . 467
I. I. Hirschman, Jr. *A note on orthogonal systems* 47
John H. Hodges, see L. Carlitz and John H. Hodges.
A. J. Hoffman, M. Newman, E. G. Straus, and O. Taussky, *On the number of absolute points of a correlation* 83
Chuan-Chih Hsiung, *Some integral formulas for closed hypersurfaces in Riemannian space.* 291
R. D. James, *Summable trigonometric series* 99
N. D. Lane, *Differentiable points of arcs in conformal n-space* . . 301
Solomon Leader, *Convergence topologies for measures and the existence of transition probabilities* 479
D. H. Lehmer, *On certain character matrices* 491
Louis F. McAuley, *A relation between perfect separability, completeness, and normality in semi-metric spaces* 315
Gerald R. MacLane, *Limits of rational functions* 111
H. B. Mann, see H. S. Butts and H. B. Mann.
Michael Maschler, *Minimal domains and their Bergman kernel function* 501
C. W. Mendel and I. A. Barnett, *A functional independence theorem for square matrices* 709
L. I. Mishoe and G. C. Ford, *On the uniform convergence of certain eigen function series* 271
L. I. Mishoe, see Bernard Friedman and L. I. Mishoe,
T. S. Motzkin, see W. L. Hart and T. S. Motzkin.
Wm. N. Myers, Jr., *Functionals associated with a continuous transformation.* 517
M. Newman, see A. J. Hoffman, M. Newman, E. G. Straus and O. Taussky.
F. Oberhettinger, *Note on the Lerch zeta function.* 117
Howard Osborn, *The problem of continuous programs.* 721
P. Panitchpakdi, see N. Aronszajn and P. Panichpakdi
H. O. Pollak, see D. J. Dickinson, H. O. Pollak and G. H. Wannier.
G. Power and D. L. Scott-Hutton, *The slow shearing motion of a liquid past a semi-infinite plane.* 327
Gerald C. Preston, *On locally compact totally disconnected abelian groups and their character groups* 121

W. T. Reid, *Oscillation criteria for linear differential systems with complex coefficients* 733
Irma Reiner, *On the two-adic density of representions by quadratic forms* 753
Irving Reiner and J. D. Swift, *Congruence subgroups of matrix groups*. 529
S. Sakai, *A characterization of W* -algebras*. 763
A. C. Schaeffer, *Entire functions*. 351
D. L. Scott-Hutton, see G. Power and D. L. Scott-Hutton
E. Silverman, *An intrinsic inequality for Lebesgue area*. 363
Vikramaditya Singh and W. J. Thron, *On the number of singular points, located on the unit circle of certain functions represented by C-fractions*. 135
Andrew Sobczyk, *Simple families of lines* 541
Charles Standish, *A class of measure preserving transformations*. . 553
J. M. Stark, *On distortion in pseudo-conformal mapping*. 565
S. Stein, *The symmetry function in a convex body*. 145
R. Steinberg, *Note on a theorem of Hadwiger*. 775
E. G. Straus, see A. J. Hoffman, M. Newman, E. G. Straus and O. Taussky.
E. G. Straus and O. Taussky, *Remark on the preceding paper. Algebraic equations satisfied by roots of natural numbers* . . . 97
J. D. Swift, see Irving Reiner and J. D. Swift.
Choy-tak Taam, *Asymptotic relations between systems of differential equations*. 373
O. Taussky, see A. J. Hoffman, M. Newman, E. G. Straus and O. Taussky; and E. G. Straus and O. Taussky.
Angus E. Taylor, see Charles C. A. Halberg Jr. and Angus E. Taylor
W. J. Thron, see Vikramaditya Singh and W. J. Thron
G. H. Wannier, see D. J. Dickinson, H. O. Pollak and G. H. Wannier
Edwin Weiss, *Boundedness in topological rings*. 149
Albert Leon Whiteman, *A sum connected with the series for the partition function*. 159
J. Eldon Whitesitt, *Construction of the lattice of complemented ideals within the unit group*. 779
Alfred B. Willcox, *Some structure theorems for a class of Banach algebras*. 177
Ti Yen, *Quotient algebra of a finite AW* algebra* 389
Joseph L. Zemmer, *Some remarks on p-rings and their Boolean geometry* 193

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should be typewritten (double spaced), and the author should keep a complete copy. Manuscripts may be sent to any of the editors. Manuscripts intended for the outgoing editors should be sent to their successors. All other communications to the editors should be addressed to the managing editor, Alfred Horn at the University of California, Los Angeles 24, California.

50 reprints of each article are furnished free of charge; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published quarterly, in March, June, September, and December. The price per volume (4 numbers) is $12.00; single issues, $3.50. Back numbers are available. Special price to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: $4.00 per volume; single issues, $1.25.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, c/o University of California Press, Berkeley 4, California.

Printed at Kokusai Bunken Insatsusha (International Academic Printing Co., Ltd.), No. 10, 1-chome, Fujimi-cho, Chiyoda-ku, Tokyo, Japan.
