Articles

J. Mozo Fernández, R. Schäfke, Asymptotic expansions and summability with respect to an analytic germ 3

J. Loubani, Moduli spaces of a family of topologically non quasi-homogeneous functions 81

A. Belotto da Silva, J. G. Espín Buendía, Topological classification of limit periodic sets of polynomial planar vector fields 105

J. Cirici, A. Roig, Sullivan minimal models of operad algebras 125

A. Amenta, E. Lorist, M. Veraar, Rescaled extrapolation for vector-valued functions 155

J.-F. Lafont, D. B. McReynolds, Primitive geodesic lengths and (almost) arithmetic progressions 183

A. Męcel, J. Okniński, Growth alternative for Hecke–Kiselman monoids 219

L. Li, A. M. Peralta, L. Wang, Y.-S. Wang, Weak-2-local isometries on uniform algebras and Lipschitz algebras 241

D. Fernández-Ternero, E. Macías-Virgós, E. Minuz, J. A. Vilches, Simplicial Lusternik–Schnirelmann category 265

B. Claudon, F. Loray, J. V. Pereira, F. Touzet, Holonomy representation of quasi-projective leaves of codimension one foliations 295

P. Anamby, S. Das, Distinguishing Hermitian cusp forms of degree 2 by a certain subset of all Fourier coefficients 307

F. Chamizo, C. Pastor, Lattice points in elliptic paraboloids 343

J. Almeida, A. Costa, J. C. Costa, M. Zeitoun, The linear nature of pseudowords 361

B. Greenfeld, A. Smoktunowicz, M. Ziembowski, Five solved problems on radicals of Ore extensions 423

A. González, T. Lozano, A. Ruiz, Some new examples of simple p-local compact groups 445

X. Tolsa, Rectifiability of measures and the β_p coefficients 491

A. Lonjou, Pavage de Voronoï associé au groupe de Cremona 521

E. Carneiro, A. Chirre, M. B. Milinovich, Bandlimited approximations and estimates for the Riemann zeta-function 601

D. Dąbrowski, Characterization of Sobolev–Slobodeckij spaces using curvature energies 663

D. Cruz-Uribe, OFS, K. Moen, H. V. Nguyen, The boundedness of multilinear Calderón–Zygmund operators on weighted and variable Hardy spaces 679

V. Vâjâitu, An interpolation property of locally Stein sets 715

C.-H. Kim, Overconvergent quaternionic forms and anticyclotomic p-adic L-functions 727
