RESEARCH ARTICLES	
C. Cabrelli, U. Molter, V. Paulauskas and R. Shonkwiler Hausdorff Measure of p -Cantor Sets	413
A. Nekvinda and L. Zajíček Extensions of Real and Vector Functions of One Variable Which Preserve Differentiability	435
S. N. Mukhopadhyay An n -th Order Integral and Its Integration by Parts with Applications to Trigonometric Series	451
Ryszard J. Pawlak and Ewa Korczak On Some Properties of Essential Darboux Rings of Real Functions Defined on Topological Spaces	495
S. Tikhonov On Moduli of Smoothness of Fractional Order	507
Zdeněk Kočan Triangular Maps Non-Decreasing on the Fibers	519
Ekrem Savaş A Summability Factor Theorem for Infinite Series	539
Miroslav Zelený An Absolutely Continuous Function with Non- σ -Porous Graph	547
Juraj Činčura, Tibor Šalát, Martin Sleziak and Vladimír Toma Sets of Statistical Cluster Points and \mathcal{I} -Cluster Points	565
Zbigniew Grande Convergence of Sequences of Functions Having Some Generalized Pawlak Properties	581
Uta Freiberg Dirichlet Forms on Fractal Subsets of the Real Line	589
Márton Elekes Hausdorff Measures of Different Dimensions are Isomorphic under the Continuum Hypothesis	605
Michaela Čiklová Dynamical Systems Generated by Functions with Connected G_δ Graphs	617
A. G. Das and Sarmila Kundu A Characterization of the GH_k Integral	639
Miroslav Zelený Descriptive Properties of σ -Porous Sets	657

Esa Järvenpää, Maarit Järvenpää and Juho Niemelä	
Transversal Mappings between Manifolds and	
Non-Trivial Measures on Visible Parts	675
Ján Borsík	
Some Classes of Strongly Quasicontinuous Functions	689
W. M. Greenlee	
On Green's Theorem and Cauchy's Theorem	703
K. J. Falconer	
Dimensions of Intersections and Distance Sets for	
Polyhedral Norms	719
Natasha Samko	
On Non-Equilibrated Almost Monotonic Functions of the	
Zygmund-Bary-Steckin Class	727
J. Marshall Ash	
An L^p Differentiable Non-Differentiable Function	747
Sergey Kostyukovsky and Alexander Olevskii	
Compactness of Families of Convolution Operators with Respect	
to Convergence Almost Everywhere	755
Zbigniew Grande	
On the Convergence of Sequences of Integrally	
Quasicontinuous Functions	767

INROADS

Lee Tuo-Yeong	
A New Characterization of Buczolic's Upper	
Semicontinuously Integrable Functions	779
Ch. Rini Indrati and Lee Peng Yee	
Dominated Convergence Theorem Involving Small	
Riemann Sums	783
F. S. Cater	
Another Application of Rolles's Theorem	795
Vlad Timofte	
New Tests for Positive Iteration Series	799
Aleksander Maliszewski	
Maximums of Almost Continuous Functions	813
Boaz Tsaban and Tomasz Weiss	
Products of Special Sets of Real Numbers	819
Zbigniew Grande	
On the Right Preponderant Limit	837
Ville Suomala	
Tangential Behavior of Functions and Conical Densities of	
Hausdorff Measures	843
András Máthé	
A Nowhere Convergent Series of Functions Converging	
Somewhere After Every Non-Trivial Change of Signs	855

Kenneth Schilling	
More Tales of Two (s)-ities.	861
Krzysztof Płotka and Ireneusz Reclaw	
Finitely Continuous Hamel Functions	867
Marcin Grande	
On the Products of Unilaterally Continuous Regulated Functions	871
Mubariz T. Karaev	
Remarks on Some Theorems on Convolution	877
