CONFERENCE ANNOUNCEMENTS[1]

THE SYMPOSIUM ON THE ROCK:
Summer Symposium in Real Analysis XXVIII

WHEN: June 7 – 13, 2004   **WHERE:** Slippery Rock, PA

Slippery Rock University and the *Real Analysis Exchange* will host the Summer Symposium in Real Analysis XXVIII. The nature of current work in real analysis is driven by the exchange of ideas generated by real analysts rooted in one subdiscipline of real analysis but with wide ranging interests. This Symposium will highlight lectures by both leading experts and energetic new researchers. Specifically, Summer Symposium XXVIII will emphasize recent important work in foundations of real analysis and integration theory. In addition, we will provide a vibrant forum for the discussion of research problems, and allot prime speaking time to recent doctoral recipients. We have applied for some participant support from the *National Science Foundation*; see our website for details and application materials. The program, will highlight hour long invited addresses by:

Udayan Darji, University of Louisville
Sławomir Solecki, University of Illinois at Urbana
Erik Talvila, University College of the Fraser Valley

Several sessions of 20 minute communications are planned during the conference. For online registration and support application forms see:
                 `http://www.stolaf.edu/people/analysis.`
Even if you pre-registered for the conference we ask that you complete the registration forms. You can request a paper copy of the registration form by emailing to: `analysis@stolaf.edu` or by contacting the Conference Director, Bob Vallin at `robert.vallin@sru.edu.`

The 11th Meeting on Real Analysis and Measure Theory

WHEN: July 11-17 2004
WHERE: Hotel Continental Terme, Ischia, Italy

The XI Meeting on Real Analysis and Measure Theory (CARTEMI) will be held in Ischia (Naples, Italy) from 11-17 July, 2004. Since 1984 it has been a biannual event where established scientists and young researchers discuss their recent work in mathematical disciplines such as Measure Theory, Real Analysis, Lattice Theory; taking into consideration their role in applications to Decision Theory, Economics, Mathematical Finance and Theoretical Physics. There will be 50 minutes invited lectures and shorter communications (25 minutes).

Invited speakers: JDM Wright (University of Reading, England), C.D. Aliprantis (University of Purdue, USA), N. Fusco (University Federico II of Naples, Italy), M.G. Graziano (University of Calabria, Italy), D. Koelzow (University of Erlangen, Germany), P. Mattila (University of Helsinki, Finland), A. Olevskii (University of Tel Aviv, Israel), W. Pfeffer (University of California, Davis).
