**REAL ANALYSIS
 EXCHANGE**

CONTENTS

EDITORIAL MESSAGES	483
CONFERENCE ANNOUNCEMENTS	
Summer Symposium in Real Analysis XXIV	
May 23–27, 2000 in Denton, Texas	485
SURVEY	
Richard G. Gibson and Tomasz Natkaniec	
Darboux Like Functions. Old Problems and New Results	487
RESEARCH ARTICLES	
Péter Komjáth	
Limits of Transfinite Sequences of Baire-2 Functions	497
Alexander Blokh	
Density of Periodic Orbits in ω -Limit Sets with the Hausdorff Metric	503
Vasile Ene	
Thomson’s Variational Measure	523
H. Hudzik, M. Mastyló, L. Maligranda, L. E. Persson	
Extension of Submultiplicativity and Supermultiplicativity of Orlicz Functions	567
F. S. Cater	
Variations on a Theorem on Rings of Continuous Functions	579
Jan Jastrzębski and Tomasz Natkaniec	
On Sums and Products of Extendable Functions	589
Krzysztof Ciesielski and Kenneth R. Kellum	
Compositions of Darboux and Connectivity Functions	599
Kandasamy Muthuvel and Arnold W. Miller	
Everywhere of Second Category Sets	607
Krzysztof Ciesielski and Saharon Shelah	
Uniformly Antisymmetric Functions with Bounded Range	615
Ryszard Jerzy Pawlak	
On Ideals of Extensions of Rings of Continuous Functions	621
P. Holický, S. P. Ponomarev, L. Zajíček, and M. Zelený	
Structure of the Set of Continuous Functions with Luzin’s Property (N)	635
Sławomir Solecki	
Making Borel Functions Look Continuous	657
Miklós Laczkovich	
Two Constructions of Sierpiński and Some Cardinal Invariants of Ideals	663
Vittorino Pata and Pietro Ursino	
Rearrangeable Functions on the Real Line	677
Omar P. Dzagnidze	
Separately Continuity Functions in a New Sense Are Continuous	695
Togo Nishiura	
Absolutely Measurable Functions on Manifolds	703
Francis Jordan	
Sums of Darboux-Like Functions from \mathbb{R}^n to \mathbb{R}^m	729
Lasha Ephremidze	
On Reverse Weak (1, 1) Type Inequalities for Maximal Operators with Respect to Arbitrary Measures	761

INROADS

T. H. Steele	
Iterative Stability in the Class of Continuous Functions	765
T. H. Steele	
A Note on Periodic Points and Commuting Functions	781
Mihaela Racilă	
On Some Properties of Quasi-Uniform Convergence and Quasi-Continuous Functions	791
Valentin A. Skvortsov and Alexei P. Solodov	
A Variational Integral for Banach-Valued Functions	799
Marcin Szyszkowski	
Points of Weak Symmetric Continuity	807
Valentin Skvortsov	
A Martingale Closure Theorem for A -Integrable Martingale Sequences	815
T. H. Steele	
The Set of Continuous Functions with Zero Topological Entropy	821
Krzysztof Banaszkowski and Tomasz Natkaniec	
Sierpiński-Zygmund Functions that have the Cantor Intermediate Value Property	827
Togo Nishiura	
Measure-Preserving Maps of \mathbb{R}^n	837
Tamás Keleti	
A 1-Dimensional Subset of the Reals that Intersects Each of its Translates in at Most a Single Point	843
Brian S. Thomson	
Some Properties of Variational Measures	845
Stewart Baldwin and Jack Brown	
A Simple Proof That $(s)/(s^0)$ is a Complete Boolean Algebra	855
Tamás Keleti	
The Dynkin System Generated by the Large Balls of \mathbb{R}^n	859
Vasile Ene	
On an Improvement of the Hake Theorem	867
Ondřej Zindulka	
Yet a Shorter Proof of an Inequality of Cutler and Olsen	873
Mark McClure	
The Hausdorff Dimension of Hilbert's Coordinate Functions	875
Vasile Ene	
On a Problem of Faure and Guénard	885
